

No. 663

UNITED STATES PATENT OFFICE.

JAMES MORGAN, OF BROOKLYN, NEW YORK.

DESIGN FOR A MONUMENT.

Specification forming part of Design No. **10,023**, dated May 29, 1877; application filed April 27, 1877.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, JAMES MORGAN, of Brooklyn, Kings county, New York, have invented a Design for a Monument, of which the following is a specification:

The nature of my design is fully shown in the accompanying drawing, to which reference is made.

The design relates to a monument for graves; and consists of three base-stones diminishing in size, and connected by beveled portions, and supporting an obelisk-shaped top part, with ornamented top band and water-shedding ridge.

By reference to the drawing, A, B, and C represent the rectangular base stones or steps, which gradually diminish in size, the lowermost one being connected with the second, and the second with the third, by beveled intermediate sections *a*, while the third or up-

permost base-stone is connected, by an ogee molding, *b*, and small vertical step, with a tapering obelisk, D. The obelisk D is provided, near the top, with a band, *e*, having plain ornamentation, and with a ridge-shaped water-shedding top, *f*, as shown in the drawing.

I claim as my invention—

1. A design for a monument, consisting of three steps, A B C, obelisk D, molding *b*, and small step *d*, and bevels *a*, as shown and described.

2. A design for the upper portion of an obelisk, consisting of ornamental band *e*, surmounted by a ridge-shaped top, *f*, as shown and described.

JAMES MORGAN.
