

No. 10,097

July 17, 1877

UNITED STATES PATENT OFFICE.

FRANKLIN M. LAWRENCE, OF PORTLAND, MAINE.

DESIGN FOR RANGES.

Specification forming part of Design No. **10,097**, dated July 17, 1877; application filed June 19, 1877.
[Term of Patent 14 years.]

To all whom it may concern:

Be it known that I, FRANKLIN M. LAWRENCE, of Portland, in the county of Cumberland and State of Maine, have invented a Design for a Range, of which the following is a specification:

The nature of my design is fully represented in the accompanying photographic illustration, to which reference is made.

My design is intended for use either with or without the hot-closet, which is shown at *a*, and comprises that part of the range above the base *b*, to and including the molding *c*. When the hot-closet is not used the body *d* of the range rests directly upon the base *b*.

The photograph annexed shows a front view of my range, together with one side containing the draft-doors, &c. The ornamentation consists of moldings, panels, and interlaced work, distinctly shown in the photograph. The doors are ornamented with an interlaced pattern upon a raised molding around the edges, and, in addition, have a raised panel in the center, which, in the case of the

smaller doors, contains the letter A in old English text. In the oven-door *e* the central panel is ornamented with an interlaced border, harmonizing with the general pattern, and surrounding the word "Atlantic," in old English text, and the panel of the hot-closet door is ornamented with a strip of similar pattern.

The remaining side of the range is of the same general pattern, while the back is as common.

What I claim as my invention, and desire to secure by Letters Patent, is—

1. The design for a range, as herein described.
2. The design for the combined range and hot-closet, as herein described and shown.

In testimony that I claim the foregoing I have hereunto set my hand this 14th day of June, 1877.

FRANKLIN M. LAWRENCE.
