# UNITED STATES PATENT OFFICE.

PETER ROSENBACH, OF BROOKLYN, NEW YORK.

## DESIGN FOR A CARD-BASKET.

Specification forming part of Design No. **10,130**, dated July 24, 1877; application filed May 8, 1877.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, PETER ROSENBACH, of Brooklyn, Kings county, in the State of New York, have originated a new Design for Card-Basket, of which the following is a full, clear, and exact description, reference being had to the accompanying drawings, making part of this specification, in which—

Figure 1 is a plan view, and Fig. 2 a side elevation.

Referring to the figures, A represents a flat bottom with six equal sides, and B B, &c., are side pieces standing at the inclination described, and joined together and to the bottom by their edges. The outer edge or rim is formed in steps *b*, extending upward and outward, as shown, to the points *c*. A square, of which each of the angular projections or steps *b* forms two sides, is worked with silk or worsted, or otherwise decorated, as shown by *b'*.

Various ornamentations may be applied to other parts at will.

I propose to manufacture the card-basket of perforated card-board, perforated metal, or analogous perforated material, which allows the device to be wrought in silk or worsted; but such mode of decoration is not essential.

I propose, in some instances, to make the basket of two thicknesses, so that both pieces may be wrought, and the wrong side of each be concealed.

The two thicknesses may be secured by blind-stitching; but this is not essential.

I prefer to make the several sides and the bottom in one piece, cutting out by dies or otherwise, in the angles, a sufficient quantity of the card-board or other material to give the proper bevel; but the lines of junction with the bottom should be sharply turned, so that the appearance presented is the same as if all the faces were formed separately and simply fastened together.

What I claim as my invention is—

The design for card-basket, having the sides B pointed and stepped with the steps *b*, decorated in squares *b'*, substantially as herein set forth and described.

In testimony whereof I have hereunto set my hand this 5th day of May, 1877, in the presence of two subscribing witnesses.

PETER ROSENBACH.
