UNITED STATES PATENT OFFICE.

DANIEL B. MOULTON, OF LYNN, MASSACHUSETTS.

DESIGN FOR ORNAMENTING SHOES AND OTHER ARTICLES.

Specification forming part of Design No. **10,261**, dated September 25, 1877; application filed September 7, 1877.
[Term of Patent 3½ years.]

To all whom it may concern :

Be it known that I, DANIEL B. MOULTON, of Lynn, in the county of Essex and State of Massachusetts, have originated and designed a Pattern for Stitching or Ornamenting Shoes or other Articles, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, making part of this specification.

The design consists in the combination of elliptic and circular arcs in such a manner that they overlap or cut each other, or they reverse so as to form points or leaves and a running or vine-like pattern.

In the drawing, A shows the overlapping or cutting of circular arcs, forming a three-lobed conventional corolla surmounting a calyx, B, formed by the reversing of the cir-

cular and elliptic arcs, while between the contiguous flowers are leaves C formed by the overlapping or cutting of the elliptic arcs. Below this is a vine-like pattern formed of semicircular arcs cutting each other on the calyx of the conventional flower, the whole forming a running pattern.

Having thus described my design, what I claim as my invention, and desire to secure by Letters Patent, is—

An ornamental design formed of elliptic and circular arcs, substantially as shown and described.

DANIEL B. MOULTON.
