# UNITED STATES PATENT OFFICE.

SAMUEL STEVENS, OF JERSEY CITY, NEW JERSEY.

## DESIGN FOR DISH-HANDLES.

Specification forming part of Design No. **10,268**, dated October 2, 1877; application filed July 23, 1877.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, SAMUEL STEVENS, of Jersey City, in the county of Hudson and State of New Jersey, have invented a new and original Design for Dish-Handles, of which the following is a specification:

The nature of my design is fully shown in the accompanying drawing, to which reference is made.

The invention relates to a design for an ornamental handle for dishes and dish-covers of all kinds.

In the drawing, A represents the raised base, from which extends the raised main part B of the handle, having abutting and inclined ends, that terminate in rounded-off projecting scrolls.

From the main portion C extends an arc-shaped center part, D, that is crowned by a top ornament consisting of fruit and leaves.

An oval recess, E, is arranged in the main portion B, and surrounded by a beaded band, E'. A raised rim, a, extends from the base along the ends, and along the edge of the center part, so as to impart a finished appearance to the handle.

I claim as my invention—

The design for dish-handles, consisting of base A, with fluted edge, half-scrolls a a, and bow-shaped binding a' a', the latter surrounding the body B of the handle, surmounted by the quarterfoil, and the central oval opening E, with beaded edge E', all as and for the purpose set forth.

SAML. STEVENS.
