# UNITED STATES PATENT OFFICE.

WATSON J. MILLER, OF CHICOPEE, MASSACHUSETTS, ASSIGNOR TO E. G. WEBSTER & BROTHER, OF NEW YORK CITY.

## DESIGN FOR DESSERT-SET.

Specification forming part of Design No. **10,277**, dated October 16, 1877; application filed October 2, 1877.  
[Term of Patent 7 years.]

*To all whom it may concern:*

Be it known that I, WATSON J. MILLER, of Chicopee, in the county of Hampden and State of Massachusetts, have invented a new and Improved Design for a Dessert-Set; and I do hereby declare that the following is a full, clear, and exact description of the same, reference being had to the accompanying drawing, making part of this specification, in which—

Figure 1 is a side view of a spoon-holder and stand therefor; and Fig. 2, a similar view of a sirup-cup and stand, each of which dessert-sets embodies my design.

The design relates to two features—first, the spoon-holder or sirup-cup; and, second, the spoon-holder or sirup-cup and stand therefor, taken together.

The body *a* of the spoon-holder or sirup-cup is goblet-shaped, or in the form of an inverted truncated conoid. It is provided with a broad base, (shown in dotted lines, Fig. 2,) and surmounted by a top piece, consisting of a band, *c*, and a flaring flange or rim, *d*, having angular points *e* on two opposite sides. The spoon-holder or the sirup-cup, together with the stand therefor, constitutes a complete article of table-ware—namely, a dessert-set. The stand consists of a base, *f*, and a curved handle, *g*. The base *f* has an inner concavity, to receive the

base of the holder or cup, and a beveled rim, *h*, as shown.

The holder or cup, and also the handle of the stand, may have any suitable ornamentation or ornamental attachments.

The sirup-cup is shown provided with a handle and hinged lid or cover; but these form no part of my design. Cream cups or holders are made similar to the sirup-cup, with the exception of the lid.

What I claim as my design is—

1. The design for a spoon-holder or sirup-cup, the same having the conoidal-shaped body and the top piece composed of the band and the flaring rim, having opposite angular points, substantially as shown and described.

2. The design for a dessert-set, consisting of the holder or cup, having the body, top piece, and base, and the stand composed of the base *f*, with beveled rim and curved handle, as shown and described.

The above specification of my invention signed by me this 25th day of September, 1877.

WATSON J. MILLER.
