UNITED STATES PATENT OFFICE.

JENKIN JONES, OF PITTSBURG, PENNSYLVANIA.

DESIGN FOR GLASSWARE.

Specification forming part of Design No. **10,297**, dated November 6, 1877; application filed October 26, 1877.
[Term of Patent 3½ years.]

To all whom it may concern:

Be it known that I, JENKIN JONES, of Pittsburg, in the county of Allegheny and State of Pennsylvania, have invented a new and useful Improvement in Design for Glassware; and I do hereby declare the following to be a full, clear, and exact description thereof, reference being had to the accompanying drawing, forming part of this specification, in which—

Figure 1 is a sectional view of a hollow article of glassware illustrating my invention. Fig. 2 is an elevation of the same.

My invention relates to an ornamental shape or configuration for hollow articles of glassware, such as bowls, covered bowls, nappies, &c.; and consists in giving to the bowl or other hollow article an outline which corresponds to the curve of a quadrantal segment of an ellipse, arranged so that the base of the bowl shall be an extension of the minor axis of the ellipse, the greatest point of curvature being at the lip of the bowl.

In the drawing, A indicates the bowl, and *a b c* the curve given thereto, the remainder of the ellipse being indicated in dotted line.

Having thus described my invention, what I claim, and desire to secure by Letters Patent, is—

As a design for glassware, the form or configuration corresponding to the curve of a quadrantal segment of an ellipse, the base of the bowl corresponding to an extension of the minor axis, and the lip to the point of greatest curvature, substantially as shown and described.

In testimony whereof I, the said JENKIN JONES, have hereunto set my hand.

JENKIN JONES.
