ELEAZER KEMPSHALL.

UNITED STATES PATENT OFFICE.

ELEAZER KEMPSHALL, OF NEW BRITAIN, CONNECTICUT.

DESIGN FOR SNAP-HOOKS.

Specification forming part of Design No. **10,319**, dated November 20, 1877; application filed November 3, 1877.
[Term of Patent 14 years.]

To all whom it may concern:

Be it known that I, ELEAZER KEMPSHALL, of New Britain, in the county of Hartford and State of Connecticut, have originated and produced a new Design for a Snap-Hook, of which the following is a full, clear, and exact description, reference being had to the accompanying illustration, making part of this specification, in which—

Figure 1 is a side elevation of a snap-hook which embodies my design; and Fig. 2 is a transverse section of the same, taken on line *x x* of Fig. 1.

The general design for the body of the hook may be any that may be desired, as my design relates more particularly to the design for the

hook proper. This hook, upon the inside, in cross-section, is semicircular, as shown in Fig. 2, and upon the outside there is a bead or rib, *a*, extending from the point of the hook to the junction of the hook and body, as shown in Fig. 1, thereby giving a pleasing appearance of solidity and neatness.

I claim as my invention—

In a snap-hook, the design for the hook proper, having the bead or rib *a* extending from point of hook to the junction of hook and body, substantially as described.

ELEAZER KEMPSHALL.
