PAT. JAN. 1, 1878

UNITED STATES PATENT OFFICE.

EMELIE B. NYHOLM, OF PHILADELPHIA, PENNSYLVANIA.

DESIGN FOR A KNITTED FABRIC.

Specification forming part of Design No. **10,389**, dated January 1, 1878; application filed December 3, 1877.
[Term of Patent $3\frac{1}{2}$ years.]

To all whom it may concern:

Be it known that I, EMELIE B. NYHOLM, of the city and county of Philadelphia, and State of Pennsylvania, have originated and designed a new and Ornamental Design for a Knitted Fabric, of which the following is a full, clear, and exact description, reference being had to the accompanying photographic illustration, making part of this specification.

A represents a portion of the body of the fabric, the same consisting of a series of connected shell-like parts, *a*, each formed by radiating threads, so extending that said parts are of quadrilateral form. The shell-like parts are circumscribed by threads *b*, which extend zigzag, and are knitted with the fabric at the places of contiguous sides of the shell-like portions.

The radiating threads of the shell-like parts *a* and the circumscribing threads *b* will be of suitable colors to produce harmonious effect, the result being a highly-ornamental and tasty design, the shell-like parts being well defined, and separated by the intervening threads *b*.

What I claim as my invention is—

The design for knitted fabric, the same consisting of shell-like parts *a*, each formed of threads radiating from a common center, and the circumscribing zigzag thread *b*, as set forth, and illustrated in the accompanying photograph.

EMELIE B. NYHOLM.
