UNITED STATES PATENT OFFICE.

THOMAS MADDOCK, OF NEW YORK, N. Y.

DESIGN FOR HANDLES OF TABLE-WARE.

Specification forming part of Design No. **10,395**, dated January 8, 1878; application filed December 29, 1877.
[Term of Patent 7 years.]

To all whom it may concern:

Be it known that I, THOMAS MADDOCK, of New York city, in the county and State of New York, have invented a new and improved design for handles, &c., of china, earthen, and metal table-ware, jugs, toilet articles, and the like, of which the following is a specification:

My design is to be known as the "City" shape, and is fully represented in the drawings.

In the drawings, Figure 1 is a plan view, showing the design applied to the handle of the cover and to the handles at ends of dish. Fig. 2 is a side elevation of the cover. Fig. 3 is an end elevation of a dish with my design applied.

My design includes a solid panel, *a*, having a suitable ornament, *b*, raised on the center of

the panel. The panel is surrounded with a raised border, *c*, rising from the center on the top, and turning into scroll-work at both ends. At each end of the panel, on the cover or dish, there is a suitable raised ornament, *e*, passing under a strap, *d*, at each side of the panel, and the cover is a raised line, crossed, and terminating in a scroll, as shown at *f*.

I claim as my invention—

The design substantially as herein set forth.

The foregoing specification for an improved design for china, earthenware, metal, &c., signed by me this 11th day of December, A. D. 1877.

THOMAS MADDOCK.
