# UNITED STATES PATENT OFFICE.

MORGAN MORGANS, JR., OF BROOKLYN, NEW YORK.

## DESIGN FOR HANDLES OF SPOONS, LADLES, &c.

Specification forming part of Design No. **10,436**, dated February 5, 1878; application filed January 19, 1878.  
[Term of patent  $3\frac{1}{2}$  years.]

*To all whom it may concern:*

Be it known that I, MORGAN MORGANS, JR., of Brooklyn, in the county of Kings, State of New York, have originated and designed a Pattern for Handles of Spoons, Ladles, Forks, and Knives, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, which represents a photographic view of my design.

This design relates to the contour of the handle, and to the ornaments on its face.

The handle A is flaring toward its outer end, which has two shoulders, *a a*, and an intervening semicircular member, *b*. The face of said handle is ornamented by the figure *c* of an angel, who is engaged in blowing two trumpets, *d*. One foot of this angel is raised, and the other rests upon an oval escutcheon, *e*, from which is suspended a chain, *f*, of leaves. Below this chain is a raised bar, *g*, from which is suspended a chain, *h*, of flowers.

What I claim as new, and desire to secure by Letters Patent, is—

1. The design for the handle of a spoon, ladle, fork, or knife, consisting of the flaring end, square shoulders *a a*, semicircular member *b*, and figure *c* of an angel intervening between the square shoulders, substantially as shown and described.

2. The design for the handle of a spoon, ladle, fork, or knife, consisting of the figure *c* of an angel and the two trumpets *d*, substantially as shown and described.

3. The design for the handle of a spoon, ladle, fork, or knife, consisting of the figure *c*, of an angel, the oval escutcheon *e*, and the chain *f* of leaves, as shown and described.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 18th day of January, 1878.

MORGAN MORGANS, JR. [L. s.]
