OR D 10,594

No. 10,594

March 26, 1878

# UNITED STATES PATENT OFFICE.

CHARLES PENCHARD, OF NEW YORK, N. Y., ASSIGNOR TO WILLIAM M. WATSON, JOHN M. KARSCH, AND WILLIAM E. WATSON, OF SAME PLACE.

## DESIGN FOR CHAIRS.

Specification forming part of Design No. **10,594**, dated March 26, 1878; application filed February 4, 1878.  
[Term of patent 3½ years.]

*To all whom it may concern:*

Be it known that I, CHARLES PENCHARD, of New York city, county, and State of New York, have originated and designed a Chair, of which the following is a full and exact description, reference being had to the accompanying photographic illustration, making a part of this specification.

The chair is more particularly designed for dining. I propose to distinguish this design by the mark "223C."

A is the seat, which is flat or plain on top, and beaded around the edge. B are the back rails, beaded with vertical beads above the seat and plain top, and C is a cross-rail with a plain top and scalloped and notched bottom. It is beaded across the front. D are cross-rails, and E are spindles, which appear continuous beyond the cross-rails D from the low points in the top rail C. Each presents a dec-

orated enlargement, as indicated by E'. G are turned legs, swelled and beaded, as shown. There are two stretchers, H, turned with beads across the front, and two of lighter hue are placed each side.

I claim as my invention—

The design for a chair herein described, consisting of the beaded seat A, provided with legs, beaded back posts B connected by scalloped cross-rail C, and rails D, and the vertical bars E provided with decorative enlargements E', as herein specified.

In testimony whereof I hereunto affix my signature in the presence of two subscribing witnesses.

CHAS. PENCHARD.
