

D17-5

EX

OR D 10,604

No. 10,604 -

Mar. 26 - 1878

UNITED STATES PATENT OFFICE.

JOHN R. LOMAS, OF NEW HAVEN, CONNECTICUT, ASSIGNOR TO B.
SHONINGER, OF SAME PLACE.

DESIGN FOR AN ORGAN-CASE.

Specification forming part of Design No. **10,604**, dated March 26, 1878; application filed February 25, 1878.
[Term of patent 14 years.]

To all whom it may concern:

Be it known that I, JOHN R. LOMAS, of New Haven, in the county of New Haven and State of Connecticut, have invented a new Improvement in Design for Organ-Case; and I do hereby declare the following, when taken in connection with the accompanying drawings and the letters of reference marked thereon, to be a full, clear, and exact description of the same, and which said drawings constitute part of this specification, and represent, in—

Figure 1, a front perspective view; Fig. 2, a rear perspective view.

This invention relates to a design for organ-cases, with special reference to a case in which the rear is exposed, as for school and similar uses; and it consists in the configuration and ornamentation of the case, as hereinafter described, and shown in the accompanying illustration.

The case is rectangular in form, with the usual buttresses at each end. The ends are paneled in two sections, one above the other, the panels of upper section terminating in arched or semicircular tops. The back has two similar sections of panels, and of the same character, the division between the two sections, the base, and corners of the case giving to the case the appearance of a frame-work filled with a series of panels.

I claim—

The design for the back and ends of an organ-case, consisting of the upper and lower panel-sections, with arched tops, as described, and shown in the accompanying illustration.

JOHN R. LOMAS.
