# UNITED STATES PATENT OFFICE.

THOMAS B. ATTERBURY, OF PITTSBURG, PENNSYLVANIA.

## DESIGN FOR GLASSWARE.

Specification forming part of Design No. **10,643**, dated April 23, 1878; application filed April 12, 1878.  
[Term of patent 3½ years.]

*To all whom it may concern:*

Be it known that I, THOMAS B. ATTERBURY, of Pittsburg, in the county of Allegheny and State of Pennsylvania, have invented a new, useful, and Improved Design for Glassware; and I do hereby declare the following to be a full, clear, and exact description thereof, reference being had to the accompanying drawing, forming part of this specification, in which—

Figure 1 illustrates my design as applied to a shallow dish with cover, such as a butter-dish. Fig. 2 represents the design as applied to a sugar-bowl, and Fig. 3 the design as applied to a spoon-holder.

Like letters refer to like parts wherever they occur.

My invention relates to a design for the ornamentation of glass and similar ware; and consists in a configuration produced by forming the article in the shape of a melon, or section thereof, or with melon-shaped flutes, and combining therewith a leaf or leaves, preferably arranged thereon or therewith as a finish.

I will now proceed to describe my design, so that others may produce the same or its equivalent.

In the drawing, *a* indicates the bowl, which may or may not be provided with a cover, *b*. To the whole article I give the general form

of a melon, or section thereof, by means of a series of flutes, *c*, the figure being arranged either on end or on its side, accordingly as a deep or shallow dish is required. The foot-stem or base of the figure I compose of a series of leaves (of the same or different varieties, as preferred) arranged symmetrically, as at *d*, and where the article is a covered dish or closed vessel a series of leaves or a single leaf may be arranged either on this cover, or partly thereon, as shown at *e*.

Where knobs or handles are desired or required, I prefer to make them in accordance with the general design, as shown at *f*, though acorns, flowers, vines, or other ornamental figures may be substituted therefor.

Having thus indicated the scope and nature of my invention, what I claim as a design for glass and similar ware is—

The form or configuration produced by combining an article having melon-flutes with a leaf or series of leaves symmetrically arranged thereon, substantially as shown and described.

In testimony whereof I, the said THOMAS B. ATTERBURY, have hereunto set my hand.

THOS. B. ATTERBURY.
