UNITED STATES PATENT OFFICE.

CHARLES A. TATUM, OF NEW YORK, N. Y., ASSIGNOR TO HIMSELF, JAMES WHITALL, R. PEARSALL SMITH, JOHN MICKLE, JR., CHARLES ROBERTS, AND WILLIAM H. NICHOLSON.

DESIGN FOR BOTTLES.

Specification forming part of Design No. **10,675**, dated May 7, 1878; application filed April 12, 1878.
[Term of patent 7 years.]

To all whom it may concern:

Be it known that I, CHARLES A. TATUM, of the city, county, and State of New York, have produced or invented a new and original Design for a Bottle, of which the following is a specification:

The nature of my design is illustrated in the accompanying drawing, Figure 1 being a side view of the bottle; Fig. 2, a sectional plan view of the body, showing the conformation of the same; and Fig. 3, a transverse section.

The bottle has opposite flat sides *a a*, rounded corners *d d*, and at opposite ends a projecting flat-faced rib, *b*. Each flat portion *a* has an arched top, which does not extend up to the neck, and above the said top is an arched portion, *e*, forming a continuation of

the rounded corners *d d*, and in the center joining the neck.

The ribbed ends *b* are curved inward at the top, so as to meet the neck.

I claim—

The within-described design for a bottle, said design comprising the opposite flat sides *a*, with arched tops, the rounded corners *d*, the projecting ribs *b*, and the arched portions *e*, all substantially as described, and as shown in and by the accompanying drawing.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

CHARLES A. TATUM.
