# UNITED STATES PATENT OFFICE.

CHARLES A. TATUM, OF NEW YORK, N. Y., ASSIGNOR TO HIMSELF, JAMES WHITALL, R. PEARSALL SMITH, JOHN MICKLE, JR., CHARLES ROBERTS, AND WILLIAM H. NICHOLSON.

## DESIGN FOR BOTTLES.

Specification forming part of Design No. **10,676**, dated May 7, 1878; application filed April 12, 1878.  
[Term of patent 7 years.]

*To all whom it may concern:*

Be it known that I, CHARLES A. TATUM, of the city, county, and State of New York, have produced or invented a new and original Design for a Bottle, of which the following is a specification:

The nature of my design is illustrated in the accompanying drawing, Figure 1 being a side view of the bottle; Fig. 2, a sectional plan view of the body, showing the conformation of the same; and Fig. 3, a transverse section.

The bottle has opposite flat sides *a a* and opposite rounded ends *b*, which join the flat sides abruptly at the points *x*. The bottle is of an oblong shape, the flat sides *a a* being wider than the bottle is thick. The body of the bottle is rounded at the top, where it joins

the neck; but each flat portion *a* has an arched top, *e*, which does not extend up to the neck.

I claim—

The within-described design for a bottle, said design comprising the opposite flat sides *a*, with arched tops *e*, and the rounded ends *b*, joining the flat sides abruptly at *x*, and rounded at the top, where they join the neck, all substantially as described, and as shown in and by the accompanying drawing.

In testimony whereof I have signed my name to this specification in the presence of two subscribing witnesses.

CHARLES A. TATUM.
