UNITED STATES PATENT OFFICE.

JOSEPH HOLLELY, OF BROOKLYN, NEW YORK.

DESIGN FOR MOLDED CARDS.

Specification forming part of Design No. **10,879**, dated October 22, 1878; application filed July 28, 1876.
[Term of patent 3½ years.]

To all whom it may concern:

Be it known that I, JOSEPH HOLLELY, of Brooklyn, in the county of Kings and State of New York, have originated a new Design for Molded Cards; and I do hereby declare that the following is a full and exact description thereof, reference being had to the accompanying drawing, representing the same.

Upon a rectangular card, A, I raise or form a molding or bead, *a*, near the edges of the card, and parallel therewith, the molding being rounded at the corners of the card, whether the card itself is or not, as represented at *b b b b*. This molding or bead *a* also curves up, as shown at *c*, around a suspending-hole, *d*, which is made in an upward projection, B, of the card, at the middle of the upper side or end of the card.

I sometimes make a second molding or bead, *f*, inside of the molding or bead *a*, and parallel with it, the corners *g g g g* being similarly rounded; but the part which passes the

curved part *c* of the molding *a* around the suspension-hole *d* is straight, as shown.

What I claim as my invention, and desire to secure by Letters Patent, is—

1. A design for a card consisting of an ornamental raised molding or bead, *a*, near its edges, with rounded corners *b b b b* and curve *c* at one side or end, substantially as represented and described.

2. A design for a molded card consisting of an ornamental raised molding or bead, *a*, near its edges, with rounded corners *b b b b* and curve *c* at one side or end, and an inner molding or bead, *f*, with rounded corners *g g g g* and straight sides and ends, substantially as represented and described.

Specification signed by me this 31st day of May, 1876.

JOSEPH HOLLELY.
