UNITED STATES PATENT OFFICE.

FRANK C. WINSHIP, OF BRIDGEPORT, OHIO, ASSIGNOR TO LA BELLE GLASS COMPANY, OF SAME PLACE.

DESIGN FOR COMBINED GLASS VESSELS.

Specification forming part of Design No. **10,954**, dated December 10, 1878; application filed November 22, 1878.
[Term of patent 3½ years.]

To all whom it may concern:

Be it known that I, FRANK C. WINSHIP, of Bridgeport, in the county of Belmont and State of Ohio, have invented a new Design for Combined Glass Vessel; and I do hereby declare the following to be a full, clear, and exact description of the same, reference being had to the accompanying drawings, forming part of this specification, in which—

Figure 1 is a perspective view, and Fig. 2 a bottom plan.

Similar letters of reference in the several figures denote the same parts.

The vessel for which my design is specially adapted is a combination of a small "individual" salt-holder with a larger holder adapted to contain celery, or to hold a napkin, or, by reducing its size, to be used as an egg-glass, or for other similar table use; and my design consists in the arrangement of an elongated flat bar, *e*, with an upwardly-projecting annular flange, constituting the salt-holder, and by an upwardly-projecting stem supporting a bowl or goblet shaped vessel, constituting the celery-holder, or its equivalent, said salt-holder and celery-holder being independent of

each other, except as connected by the base-plate. This necessarily gives the whole combination a peculiar configuration, which is the subject of this invention, independently of any particular ornamentation of the combined vessel.

In the drawings, B is the base; S, the salt-holder, and C the celery-holder, arranged as above described.

The edges of the base may be fluted, as shown at *a*, and the sides of the salt-holder may be fluted as shown at *e*.

mm are crossed marks or indentations on the under side of the base, that show through it and add to the beauty of the device.

I claim as my invention—

The design for a combined vessel for table use, herein described, consisting, essentially, in the elongated flat glass base-plate B, supporting the annular salt-vessel S, and the stem and bowl C, arranged with relation to each other in the form substantially as described.

FRANK C. WINSHIP.
