

No. 10,961

December 10, 1878

UNITED STATES PATENT OFFICE.

RICHARD T. WEBB, OF RANDALSTOWN, IRELAND.

DESIGN FOR WOVEN BORDERS FOR TOWELS.

Specification forming part of Design No. **10,961**, dated December 10, 1878; application filed November 14, 1878.
[Term of patent 3½ years.]

To all whom it may concern:

Be it known that I, RICHARD THOMAS WEBB, of Randalstown, in the county of Antrim, Ireland, have invented and produced a new and original Design or Pattern for Woven Borders for the Ends of Towels or other similar articles; and I do hereby declare the following to be a full and clear description of said design, reference being had to the accompanying photographic illustration, forming a part of this specification.

The design consists of the central figure, A, formed by the interweaving of the threads, as shown, having on each side of this central figure, at equal distances therefrom, the spirally-formed bands or stripes B B and the narrow figures C C, and on the extreme outer edges the double-corded figures or stripes D D and the intervening blank spaces E E.

This pattern may be woven entirely in white, the configuration of the design being pro-

duced by raised or heavy threads only; or it may be produced more strikingly in colors by the use of colored strands, such as red and blue, for some of the figures.

The pattern of the towel or article on which the border is used is immaterial, as this design is for the border or end finish, and may be produced on any style or pattern of towel or other similar article, and formed in part or whole of any desired color.

What I claim as my invention or production, and desire to secure by Letters Patent, is—

The design for woven border for towels and other similar articles, substantially as shown in the annexed photographic illustration.

RICHARD THOS. WEBB.
