UNITED STATES PATENT OFFICE.

ALBERT PATITZ, OF WEST MERIDEN, CONNECTICUT, ASSIGNOR TO BRADLEY
& HUBBARD MANUFACTURING CO., OF SAME PLACE.

DESIGN FOR INKSTAND-HOLDER.

Specification forming part of Design No. **10,983**, dated January 14, 1879; application filed November 1, 1878.
[Term of patent $3\frac{1}{4}$ years.]

To all whom it may concern:

Be it known that I, ALBERT PATITZ, of West Meriden, in the county of New Haven and State of Connecticut, have invented a new Design for Inkstand-Holder; and I do hereby declare the following, when taken in connection with the accompanying drawing, to be a full, clear, and exact description of the same, and which said drawing constitutes part of this specification, and represents a perspective view.

This invention relates to a design for inkstand-holders, and especially to the base; and consists in the configuration and ornamentation as hereinafter described, and shown in the accompanying illustration.

The platform on which the inkstands rest is in the form of a parallelogram. The edge of the base is turned downward, but inclined outward, or expanding. At the center front is

a projection starting each side of the center, and extending diagonally outward to a point at the center, and at each end are similar central pointed projections, the feet on which the base rests extending downward from each projecting angle.

I claim—

The design for base for inkstand-holder, consisting of the platform in shape a parallelogram, with inclined or beveled edge, the front and ends having each a central projection, the sides of which run diagonally back from the central point, and intersect the respective edges of the base about midway between the said central point and the angles of the base, as shown in the accompanying illustration.

ALBERT PATITZ.
