UNITED STATES PATENT OFFICE.

LEOPOLD GRAF, OF NEWARK, NEW JERSEY.

DESIGN FOR HEEL-PLATES.

Specification forming part of Design No. **11,006**, dated February 4, 1879; application filed January 3, 1879.
[Term of patent 14 years.]

To all whom it may concern:

Be it known that I, LEOPOLD GRAF, of Newark, in the county of Essex and State of New Jersey, have originated and designed a Pattern for Heel-Plate, of which the following is a full, clear, and exact description, reference being had to the accompanying drawing, making part of this specification.

The accompanying drawing represents a face view of a plate containing my design.

My design consists of a concavo-convex segment, having ogee-shaped ends.

In the drawing, the letter A designates a heel-plate, consisting of a segment, the inner edge, *b*, of which is concave, while the outer edge, *c*, is convex, and the ends, *d d*, of which are ogee-shaped.

A plate of this shape has a neat appearance, and can readily be distinguished from others of its class.

What I claim as new, and desire to secure by Letters Patent, is—

The design for a heel-plate, consisting of a concavo-convex segment having ogee-shaped ends, substantially as described, and shown in the accompanying drawing.

In testimony that I claim the foregoing I have hereunto set my hand and seal this 28th day of December, 1878.

LEOPOLD GRAF. [L. S.]
