UNITED STATES PATENT OFFICE.

JOHN CAMPBELL, OF LONDON, ENGLAND, ASSIGNOR TO BIGELOW CARPET COMPANY, OF CLINTON, MASSACHUSETTS.

DESIGN FOR CARPET.

Specification forming part of Design No. **11,037**, dated February 25, 1879; application filed January 16, 1879.
[Term of patent 3½ years.]

To all whom it may concern:

Be it known that I, JOHN CAMPBELL, of London, in the Kingdom of Great Britain, have invented a new and original Design for a Carpet, of which the following is a specification:

This invention relates to a new and original design for carpets, oil-cloths, and similar fabrics; and consists of the new configuration and ornamentation of parts hereinafter more fully pointed out.

The accompanying photographic illustration represents a face view of my new design.

A is one figure of the carpet. Around the same are represented cross-shaped figures *a a*, &c. These cross-shaped figures are arranged in parallel rows, as shown, and are connected by approximately rectangular figures *b b*, &c., so that each figure A remains between four figures *a* and four figures *b*. Each of the figures *b* has three straight sides and one curved, wave-like side, which faces the figure A, as shown.

The above-described groups of figures inclose two different kinds of spaces. Within the first kind of these spaces, A, is represented a group, *c*, formed of a tree, of flowers and leaves, as shown, while the second kind of spaces, B, which is faced by the straight lines of the rectangles *b*, contains a circular figure, *d*, with scalloped outline. This circular figure is divided by a diagonal zigzag line, *e*, into two fields, each of such fields being ornamented by groups of flowers and leaves, as shown.

Each of the cross-shaped figures *a a*, &c., consists of wings and a center-piece, each wing being made of different outline than the other wings on the same figure, while the center-piece is made of circular form, and resembles in outline the figure *d*, above described. Each wing of the cross-shaped figures *a a*, &c., contains, moreover, a small ornamentation, which is different from the ornamentations on the other wings of the same figure. I have shown as such ornamentation the following figures, viz: two squares in one wing placed diagonally adjoining each other, two

adjoining rectangles in another wing, two squares placed side by side in one wing, two fan-shaped figures in one wing, two circles in one wing, one rectangle in one wing, three circles in one wing, and two hexagons in one wing; but it is evident that other ornaments may be substituted for the above without changing the characteristic features of my design.

The figures *b b*, &c., are embellished by groups of leaves, as shown.

I claim—

1. The design for a carpet, consisting of the cross-shaped figures *a a*, &c., arranged as described, and connected by the rectangular figures *b b*, substantially as shown.

2. The design for a carpet, consisting of the cross-shaped figure *a*, which is composed of a center-piece and series of wings, each of the wings on each figure being made of different outline, substantially as shown.

3. The design for a carpet, consisting of the cross-shaped figure *a*, provided with the different ornamentations on the wings, substantially as shown.

4. The design for a carpet, consisting of figures *b b*, made with three straight and one curved, wave-like side, and embellished by groups of leaves, substantially as shown.

5. The design for a carpet, consisting of the group *c* in the field A, said group being formed of the tree and flowers and leaves, substantially as shown.

6. The design for a carpet, consisting of the circular scalloped figure *d*, divided by a diagonal line, *e*, into two fields, and ornamented, substantially as shown.

7. The design for a carpet, consisting of the figures *a b*, group *c*, and figure *d*, substantially as shown.

The foregoing description of my invention signed by me this 3d day of December, 1878.

JOHN CAMPBELL.
