UNITED STATES PATENT OFFICE.

JOHN CAMPBELL, OF LONDON, ENGLAND, ASSIGNOR TO BIGELOW CARPET COMPANY, OF CLINTON, MASSACHUSETTS.

DESIGN FOR CARPET.

Specification forming part of Design No. **11,050**, dated March 4, 1879; application filed January 16, 1879.
[Term of patent 3½ years.]

To all whom it may concern:

Be it known that I, JOHN CAMPBELL, of London, in the Kingdom of Great Britain, have invented a certain new and original Design for a Carpet, of which the following is a specification:

This invention relates to a new and original design for carpets, oil-cloths, and similar fabrics; and consists of the new configuration and ornamentation of parts, hereinafter more fully pointed out.

The accompanying photographic illustration represents a face view of my new design. The same is composed substantially of the following-described figures, arranged as shown in the photographic illustration.

An elliptical figure, *a*, with scalloped outline and ornamented by floral decorations, partly covers an octagonal figure, *b*, which is likewise embellished with leaves and with interspersed dots, as shown.

c, *d*, and *e* are three fan-shaped figures, which figures I consider as forming the most characteristic feature of the design. I have shown the fan-shaped figure *c* to contain part of a square, *f*, which square is partly covered by the ellipse *a*. The fan *d* is near the fan *c*, while the fan *e* is at some little distance from the fan *d*.

The three fans are richly decorated by floral designs; but it is evident that different ornamentations for the fans *c d e* may be substituted for those shown.

g h i are three circular figures, made with undulating outlines, and partly overlapping each other, thus forming a group, as shown. These figures are ornamented by floral design. The figure *g* is also partly covered by the fan *e*, the figure *h* by the fan *c*, and the figure *i* by the ellipse *a*.

Between the circular figure *i* and the octagonal figure *b*, and partly overlapped by the latter, is a rectangular figure, *j*, embellished by a rich floral ornamentation, and provided with an ornamental border, *k*, as shown.

l is a circular figure situated between the figures *b* and *g*, and partly overlapped by both. This figure *l* is, by inner arcs, divided into a series of lentil-shaped figures, within which is a central star-shaped figure, as shown.

m is an irregular figure, with curved outline, separating the fan *d* from the figures *g* and *l*.

A circular figure, *n*, separates the fan *d* from the border *k* of the figure *j*, and from the circular figure *i*. The figures *m* and *n* are also suitably ornamented.

The background *A* of the carpet may be embellished by and composed of several smaller geometrical and other designs, as shown.

I claim—

1. The design for a carpet, consisting of the elliptical figure *a* and the octagonal figure *b*, the former of which partly overlaps the latter, substantially as shown.

2. The design for a carpet, consisting of the fan-shaped figures *c d e*, arranged in relation to each other substantially as shown.

3. The design for a carpet, consisting of the elliptical figure *a* and fan-shaped figure *c*, the former of which partly overlaps the latter, substantially as shown.

4. The design for a carpet, consisting of the fan-shaped figure *c*, containing part of a square, *f*, substantially as shown.

5. The design for a carpet, consisting of the circular figures *g h i*, having undulating outline, of which the figures *g* and *i* partly overlap the figure *h*, substantially as shown.

6. The design for a carpet, consisting of the circular figure *l*, divided by inner arcs into lentil-shaped figures, and a central star, substantially as shown.

7. The design for a carpet, consisting of the irregular figure *m* between the figures *g l* and the fan-shaped figure *d*, to form a group, substantially as shown.

8. The design for a carpet, consisting of the rectangular figure *j* and border *k*, and of the octagonal figure *b*, of which the latter figure partly overlaps the figure *j*, substantially as shown.

9. The design for a carpet, consisting of the fan-shaped figure *d*, rectangular figure *j*, having border *k*, circular figure *i*, and figure *n*, substantially as shown.

10. The design for a carpet, consisting of the figures *a, b, c, d, e, f, g, h, i, j, l, m,* and *n*, substantially as shown.

The foregoing description of my invention signed by me this 3d day of December, 1878.

JOHN CAMPBELL.
