UNITED STATES PATENT OFFICE.

JOHN GRIMSHAW, OF PATERSON, NEW JERSEY.

DESIGN FOR A HANDKERCHIEF.

Specification forming part of Design No. **11,051**, dated March 4, 1879; application filed January 30, 1879.
[Term of patent 3½ years.]

To all whom it may concern:

Be it known that I, JOHN GRIMSHAW, of Paterson, in the county of Passaic and State of New Jersey, have invented a new and original Design for Handkerchief, of which the following is a specification:

This invention relates, first, to the new ornamentation of the body of a handkerchief, and, second, to the new ornamentation of the border for the same.

The accompanying photograph illustrates my new design.

The body A of the handkerchief contains two series of double and parallel stripes or bands, the double stripes *a* of one series intersecting the double stripes *b* of the other series at right angles, forming a reverse twill. At each of the intersections of the double lines *a* *b* a small square, *d*, is formed. The body A is, by the double stripes *a* *b*, also divided into larger squares *e*, as shown.

The border B of the handkerchief contains one line, *f*, at the inner, and another line, *g*, at the outer, side, and is divided by two series, *h* *i*, of three parallel lines each, into three stripes, as shown.

I claim—

1. The design for the body of a handkerchief, which consists of the lines *a* *b*, that form the small squares *d* at the intersections, and the large squares *e*, substantially as described and shown.

2. The design for the border B of a handkerchief, the same consisting of the lines *f* *g*, and of the series of lines *h* *i*, each of three parallel lines, substantially as described and shown.

JOHN GRIMSHAW.
