# UNITED STATES PATENT OFFICE.

GILBERT S. CLARK, OF HACKENSACK, NEW JERSEY.

## DESIGN FOR PENCIL-CASES.

Specification forming part of Design No. **11,069**, dated March 11, 1879; application filed February 6, 1879.  
[Term of patent 7 years.]

*To all whom it may concern:*

Be it known that I, GILBERT S. CLARK, of Hackensack, in the county of Bergen and State of New Jersey, have originated and designed a Case for Pencils, Pens, Tooth-Picks, Watch-Keys, and other devices, of which the following is a full, clear, and exact description, reference being had to the accompanying drawings, making part of this specification, in which—

Figure 1 is a side view of my design. Fig. 2 is a top view of the same.

Similar letters of reference indicate corresponding parts.

My new design consists in a case, A, which is made in the form of a trumpet, provided with beads *a a'*, as shown, and also with eyes *b b'*, to the latter of which is attached a ring, B. On one side of the line *c* is a flaring piece, C, and from this line to the point *x* the case A gradually tapers, terminating in a flaring mouth-piece, D, of the form shown in Fig. 2.

Protruding from the smaller end of the trumpet or mouth-piece D is a pencil-nib, E; but instead of the pencil-nib a watch-key or tooth-pick may be substituted. The eye *b'* is located near the bead *a'*, and the eye *b* is located near the bead *a*, but may be arranged farther from it than I have shown in the drawings.

The tube or case A may be ornamented with any figure that may be selected in addition to the devices shown.

Having described my new design, I claim—

The case A, having the form of a trumpet, provided with beads *a a'* and eyes *b b'*, a ring, B, and a nib, E, the whole forming a new and original design for the case of a pencil, watch-key, or tooth-pick, substantially as above described.

GILBERT S. CLARK.
