Here it is, (b) (6). If you need more experimental detail, I can give it to you. The investigators involved would basically be (b) (6) and myself. (b) (6) (phagocytosis and molecular biology studies), (b) (6) (aerosol challenge studies) and a veterinary pathologist would also be involved.

>(b) (6)

> I want to submit a UFR for doing some research on "atypical" (exceptionally virulent) strains of B. anthracis. Basically it would be looking at the strains from several perspectives (molecular, physiological, immunological, pathogenic, etc.) It would involve several of the anthrax researchers in the division. Any assistance you can provide would be great.

> (b) (6) has indicated to us that supplemental \$\$ may be available for Unfunded Requirements (UFRs). This may amount to potentially several million \$\$ to be distributed among all the bio and chem defense labs. (b) (6) thought that this might be a good time to submit new UFRs from the respective Divisions. I've attached a guidance sheet which outlines the identification of a task as a "UFR". If you decide that you have a UFR which applies directly to ongoing research projects in your lab (current year expenditures), please submit a short write-up to me by 16 Feb. Use a format similar to the ones that are presented in the FY 99 UFR list, which I've also attached. After a review by (b) (6) and myself, I'll consolidate and forward them to (b) (6). A major (and rather puzzling) restriction is that the requested \$\$ CANNOT be used for purchasing equipment (just supplies), but as you'll see in the FY 99 list, there are several pieces of equipment specified. I'm trying to resolve this conflict with (b) (6), and will get back to you all, once I have an answer. For now, assume that equipment purchases are o.k. (if the work can't be accomplished w/o them). If you have any questions, please give me a shout or stop by. TNX. (b)
