## Biochemical Sensing

<a href="#">Carbon Nanotube Array based Surface Acoustic Wave Gas Sensor Simulation .....</a>	<a href="#">1</a>
<i>Viatcheslav Barkaline, Belarussian National Technical University; Alexander Chashinski, Belarussian National Technical University</i>	
<a href="#">Assessing Sperm Motility using Acoustic Plate Mode Devices .....</a>	<a href="#">4</a>
<i>C.R. Evans, Nottingham Trent University; S. Atherton, Nottingham Trent University; D.C. Hughes, Nottingham Trent University; G. McHale, Nottingham Trent University; M.I. Newton, Nottingham Trent University</i>	
<a href="#">Fast, Continuous and Accurate Frequency Shift Measurement in the AC Electrogravimetry Technique .....</a>	<a href="#">6</a>
<i>Robinson Torres, Antioquia School of Engineering-Health Sciences Institute; Antonio Arnau, Universidad Politécnica de Valencia; Hubert Perrot, Université P. et M. Curie</i>	
<a href="#">Analysis of the Quartz Crystal Resonator in Non-Electrolytic and Electrolytic Environments .....</a>	<a href="#">11</a>
<i>Maria Isabel Osorio-Garcia, Otto-von-Guericke University Magdeburg; Ulrike Hempel, Otto-von-Guericke University Magdeburg; Ralf Lucklum, Otto-von-Guericke University Magdeburg; Peter Hauptmann, Otto-von-Guericke University Magdeburg</i>	
<a href="#">Oscillation Frequency Stability of QCM-Biosensor in Liquid based on Electronic Circuit Technology for Telecommunication .....</a>	<a href="#">16</a>
<i>Shunichi Wakamatsu, Nihon Dempa Kogyo Co., Ltd.; Shigenori Watanabe, Nihon Dempa Kogyo Co., Ltd.; Takehito Ishii, Nihon Dempa Kogyo Co., Ltd.; Mitsuaki Koyama, Nihon Dempa Kogyo Co., Ltd.; Hidenobu Aizawa, AIST; Shigeru Kurosawa, AIST</i>	
<a href="#">Development of SH-SAW Sensing System for Liquids .....</a>	<a href="#">20</a>
<i>Jun Kondoh, Shizuoka University; Yusuke Okiyama, Shizuoka University; Satoru Mikuni, Shizuoka University; Yoshikazu Matsui, Shizuoka University; Hiromi Yatsuda, Japan Radio Co. Ltd.; Makoto Nara, Japan Radio Co. Ltd.</i>	

## Physical Sensing

<a href="#">Mass Flow Sensor using Dual SAW Device .....</a>	<a href="#">25</a>
<i>Tooru Nomura, Shibaura Institute of Technology; Atushi Saitoh, Shibaura Institute of Technology; Koichi Koyama, Shibaura Institute of Technology</i>	
<a href="#">Gap Wave Propagation in Functionally Graded Piezoelectric Material Structures .....</a>	<a href="#">31</a>
<i>Jianke Du, Ningbo University; Kai Xian, Ningbo University; Ji Wang, Ningbo University</i>	

<b>Extending the Frequency Limits of Non-Contact Acoustic Generation .....</b>	<b>36</b>
<i>Jaehyuk Lee, University of Cambridge; B. Araya-Kleinsteuber, University of Cambridge; A.C. Stevenson, University of Cambridge; C.R. Lowe, University of Cambridge</i>	
<b>Temperature-Compensated Structure for Saw Pressure Sensor in Very High Temperature .....</b>	<b>40</b>
<i>Trang Hoang, CEA/LETI; Patrice Rey, CEA/LETI; Marie-Helene Vaudaine, CEA/LETI; Jean-Sébastien Danel, CEA/LETI; Philippe Robert, CEA/LETI; Philippe Benech, INPG/UJF/CNRS; Pierre Lemaitre-Auger, IMEP INPG/UJF/CNRS</i>	
 <b>Microwave Atomic Frequency Standards &amp; Applications I</b>	
<b>A Mechanism of Rubidium Atomic Clock Degradation: Ring-Mode to Red-Mode Transition in rf-Discharge Lamps .....</b>	<b>45</b>
<i>James Camparo, The Aerospace Corporation; Ryan Mackay, The Aerospace Corporation</i>	
<b>Two-Photon ac-Stark Effect in Raman-Ramsey Interactions .....</b>	<b>49</b>
<i>Junhai Zhang, Science School of Harbin Engineering University; Jingbiao Chen, Peking University</i>	
<b>Multiple <math>\pi/2</math> Pulse Area Operation of Caesium Fountains and the Collisional Frequency Shift .....</b>	<b>52</b>
<i>S. Weyers, Physikalisch-Technische Bundesanstalt; R. Wynands, Physikalisch-Technische Bundesanstalt; K. Szymaniec, National Physical Laboratory; W. Chalupczak, National Physical Laboratory</i>	
<b>The Second Cesium Fountain Clock NIM5: Construction and the First Evaluation in 2007 .....</b>	<b>55</b>
<i>Tianchu Li, National Institute of Metrology; Mingshou Li, National Institute of Metrology; Pingwei Lin, National Institute of Metrology; Ping Wang, National Institute of Metrology; Weiliang Chen, National Institute of Metrology; Nianfeng Liu, National Institute of Metrology; Yige Lin, National Institute of Metrology</i>	
<b>New Vapor Cell Technology for Chip Scale Atomic Clock .....</b>	<b>58</b>
<i>A. Douahi, FEMTO-ST Institute; L. Nieradko, FEMTO-ST Institute; J.C. Beugnot, FEMTO-ST Institute; J. Dziuban, FEMTO-ST Institute; H. Maillotte, FEMTO-ST Institute; R. Boudot, FEMTO-ST Institute; S. Guérandel, SYRTE; M. Moraja, SAES Getter; C. Gorecki, FEMTO-ST Institute; V. Giordano, FEMTO- ST Institute</i>	
<b>High Accuracy Gravitational Red-Shift Evaluation at INRIM .....</b>	<b>62</b>
<i>D. Calonico, INRiM; F. Levi, INRiM; L. Lorini, INRiM; A. Godone, INRiM; A. Cina, Politecnico di Torino; I.H. Bendea, Politecnico di Torino</i>	
<b>Frequency Stability Measurement of a Raman-Ramsey Cs Clock .....</b>	<b>67</b>
<i>N. Castagna, LNE-SYRTE; S. Guérandel, LNE-SYRTE; F. Dahès, LNE-SYRTE; T. Zanon, LNE-SYRTE; E. de Clercq, LNE-SYRTE; A. Clairon, LNE-SYRTE; N. Dimarcq, LNE-SYRTE</i>	
<b>Principle of Pulsed-Interrogation Automatic Cavity Tuning for the ACES Hydrogen Maser .....</b>	<b>71</b>
<i>Christian Weber, Observatoire de Neuchâtel; Marc Duerrenberger, Observatoire de Neuchâtel; Hartmut Schweda, Observatoire de Neuchâtel</i>	
<b>OSCC Project: A Space Cs Beam Optically Pumped Atomic Clock for Galileo .....</b>	<b>77</b>
<i>V. Hermann, Thales Electron Devices; M. Gazard, Thales Electron Devices; P. Berthoud, Observatoire de Neuchâtel; S. Lecomte, Observatoire de Neuchâtel; R. Ruffieux, Observatoire de Neuchâtel; C. Audoin, SYRTE; R. Barillet, Observatoire de Paris; E. de Clercq, SYRTE; S. Guérandel, SYRTE</i>	

<b>"Zeroing" of Magnetic Resonance Signals and Amplitude Noises Caused by Frequency Emission Fluctuations When Pumping Atoms with D<sub>2</sub> - line in Magnetometers and Gas-Cell Frequency Standards .....</b>	<b>81</b>
<i>E.N. Pestov, The Federal State Scient./Production Enterprise "Geologorazvedka"</i>	
<b>A New Design of ECLD for Compact Atomic Clocks .....</b>	<b>86</b>
<i>S. Perrin, LNE-SYRTE; F-X. Esnault, LNE-SYRTE; D. Holleville, LNE-SYRTE; S. Guérandel, LNE-SYRTE; N. Dimarcq, LNE-SYRTE; V. Ligeret, Alcatel Thales III</i>	
<b>Design Details of FOCS-2, an Improved Continuous Cesium Fountain Frequency Standard .....</b>	<b>90</b>
<i>Ferenc Füzesi, LTF-IMT; Mark D. Plimmer, LNE-INM/CNAM; Gregor Dudle, METAS; Jocelyne Guéna, LNE-SYRTE; Pierre Thomann, LTF-IMT</i>	
 <b>Atomic Optical Frequency Standards &amp; Application I</b>	
<b>Proposed Active Optical Frequency Standards based on Magneto-Optical Trap Trapped Atoms .....</b>	<b>96</b>
<i>Wei Zhuang, Peking University; Deshui Yu, Peking University; Zhenhui Chen, Peking University; Kaikai Huang, Peking University; Jingbiao Chen, Peking University</i>	
<b>Improved Precision Measurement of Refractive Indices of Gases using Frequency Comb .....</b>	<b>100</b>
<i>J. Zhang, Max-Planck Research Group; Z.H. Lu, Max-Planck Research Group; L.J. Wang, Max-Planck Research Group</i>	
<b>Absolute Mode Number Determination of Frequency Combs .....</b>	<b>104</b>
<i>J. Zhang, Max-Planck Research Group; Z.H. Lu, Max-Planck Research Group; Y.H. Wang, Max-Planck Research Group; T. Liu, Max Planck Research Group; A. Stejskal, Max Planck Research Group; Y.N. Zhao, Max-Planck Research Group; L.J. Wang, Max-Planck Research Group; R. Dumke, Nanyang Technological University</i>	
<b>External Cavity Diode Laser Frequency Control using FM Sideband Technique with Acousto - Optical Modulator as an External Phase Modulator .....</b>	<b>107</b>
<i>V. Baryshev, IMVP FGUP VNIIFTRI; Y. Domnin, FGUP VNIIFTRI; L. Kopylov, IMVP FGUP VNIIFTRI</i>	
<b>Influence of High-Frequency Laser Frequency Noise on the Stability of an Optical Clock .....</b>	<b>111</b>
<i>Tatiana Nazarova, Physikalisch-Technische Bundesanstalt; Harald Schnatz, Physikalisch-Technische Bundesanstalt; Burghard Lipphardt, Physikalisch-Technische Bundesanstalt; Fritz Riehle, Physikalisch- Technische Bundesanstalt; Uwe Sterr, Physikalisch-Technische Bundesanstalt; Christian Lisdat, Leibniz Universität Hannover</i>	
<b>Absolute Frequency Shifts of Stabilized Nd:YAG Lasers – A Question of Iodine Cell Technology .....</b>	<b>115</b>
<i>Josef Lazar, Academy of Sciences of the Czech Republic; Jan Hrabina, Academy of Sciences of the Czech Republic; František Petráň, Academy of Sciences of the Czech Republic; Petr Jedlička, Academy of Sciences of the Czech Republic; Ondřej Číp, Academy of Sciences of the Czech Republic; Radek Šmíd, Academy of Sciences of the Czech Republic</i>	
<b>Ultracold <sup>88</sup>Sr Atoms for an Optical Lattice Clock .....</b>	<b>119</b>
<i>Thomas Legero, Physikalisch-Technische Bundesanstalt; Joseph Sundar Raaj Vellore Winfred, Physikalisch- Technische Bundesanstalt; Fritz Riehle, Physikalisch-Technische Bundesanstalt; Uwe Sterr, Physikalisch- Technische Bundesanstalt</i>	

<b>Jitter Reduction of the 729 nm Clock Laser for a Ca<sup>+</sup> Optical Frequency Standard</b> .....	123
<i>C. Zumsteg, CNRS; G. Hagel, CNRS; C. Champenois, CNRS; D. Guyomarc'h, CNRS; M. Houssin, Université de Provence, PIIM; M. Knoop, CNRS; M. Vedel, CNRS; F. Vedel, CNRS; P. Dubé, Institute for National Measurement Standards-National Research Council</i>	

<b>High-Bandwidth Frequency Stabilization of a Fibre-Laser Frequency Comb</b> .....	128
<i>C.R. Locke, University of Western Australia; T.M. Fortier, University of Western Australia; J.J. McFerran, University of Western Australia; P.S. Light, University of Bath; F. Benabid, University of Bath; E.N. Ivanov, University of Western Australia; A.N. Luiten, University of Western Australia</i>	

<b>Absolute Frequency Measurement of F=4 --&gt; F'=5 Line of Cesium D2 in an Optical Clock Configuration with Amplified Optical Comb</b> .....	132
<i>Eok Bong Kim, KRISS; Sang Eon Park, KRISS; Chang Yong Park, KRISS; Won-Kyu Lee, KRISS; Dai Hyuk Yu, KRISS; Ho Seong Lee, KRISS; Hyuck Cho, Chungnam National University</i>	

## **Resonators, Filters & Materials I**

<b>Packageless SAW Devices with Isolated Layer Acoustic Waves (ILAW) and Waveguiding Layer Acoustic Waves (WLAW)</b> .....	135
<i>K. Bhattacharjee, RF Micro Devices; A. Shvetsov, Moscow Power Engineering Institute; S. Zhgoon, Moscow Power Engineering Institute</i>	

<b>Solidly-Mounted Agile Resonator / Transducer</b> .....	141
<i>Arthur Ballato, U.S. Army Communications-Electronics RDEC</i>	

<b>Development of Miniature Quad SAW Filter Bank based on PCB Substrate</b> .....	146
<i>Youngjin Lee, Korea Institute of Ceramic Engineering &amp; Technology; Jonghoo Paik, Korea Institute of Ceramic Engineering &amp; Technology; Seunghee Lee, Samsung Electro-Mechanics Co. Ltd.</i>	

<b>Research on Miniaturization of Low-Frequency Range SMD Crystal Unit</b> .....	150
<i>Masakazu Harada, Nihon Dempa Kogyo Co., Ltd.; Koji Kubota, Nihon Dempa Kogyo Co., Ltd.; Hidesada Takahashi, Nihon Dempa Kogyo Co., Ltd.</i>	

<b>High-Frequency Resonators with Excellent Temperature Characteristics using Edge Reflection</b> .....	154
<i>Michio Kadota, Murata Mfg. Co., Ltd.; Tetsuya Kimura, Murata Mfg. Co., Ltd.</i>	

<b>Absolute Measurement of Surface-Vibration-Patterns in Piezoelectric Devices using Two Lasers with Different Wavelengths</b> .....	160
<i>Yasuaki Watanabe, Tokyo Metropolitan University; Noriyuki Imaeda, Tokyo Metropolitan University; Shigeyoshi Goka, Tokyo Metropolitan University; Takayuki Sato, Tokyo Metropolitan University; Hitoshi Sekimoto, Tokyo Metropolitan University; Sunao Ishii, Hitachi, Ltd.</i>	

<b>Characterization through Cathodoluminescence and Thermoluminescence of -SiO<sub>2</sub> Single Crystals Before and After -Radiation Treatments: Contribution to the Evaluation of the Influence of Defects on the Frequency-Shifts</b> .....	164
<i>P. Guibert, CNRS; R. Chapoulie, CNRS; S. Dubernet, CNRS; A. Largeteau, ICMCB, CNRS, Université Bordeaux; G. Demazeau, ICMCB, CNRS, Université Bordeaux</i>	

<b>Closed Regular Electrode Structure for SAW Resonators .....</b>	<b>168</b>
<i>S.V. Biryukov, Leibniz Institute for Solid State and Materials Research Dresden; G. Martin, Leibniz Institute for Solid State and Materials Research Dresden; M. Wehnacht, InnoXacs</i>	
<b>Measurements of Radiation Induced Defects in Quartz Material by Dielectric Relaxation Spectroscopy .....</b>	<b>172</b>
<i>Olivier Cambon, Université de Montpellier; Sabine Devautour-Vinot, Université de Montpellier; Nathalie Prud'Homme, Université de Montpellier; Jean Charles Giuntini, Université de Montpellier</i>	
<b>Fabrication of 945 MHz Band Film Surface Acoustic Wave Resonators using ZnO Thin Film with Si Substrate .....</b>	<b>176</b>
<i>E. Ntagwirumugara, Institut d'Electronique de Microélectronique et de Nanotechnologie; T. Gryba, Institut d'Electronique de Microélectronique et de Nanotechnologie; V. Zhang, Institut d'Electronique de Microélectronique et de Nanotechnologie; J. Carlier, Institut d'Electronique, de Microélectronique et de Nanotechnologie; J.E. Lefebvre, Institut d'Electronique de Microélectronique et de Nanotechnologie</i>	
<b>Imperfections Influence Modeling upon Eigenvibrations in a Convex Piezoelectric Plate of AT-cut .....</b>	<b>181</b>
<i>Oleksandr Yu Shmaliy, Ukrainian Engineering Pedagogical Academy; Yuriy S. Shmaliy, Guanajuato University</i>	
<b>Simple Energy Level Model for Frequency Degradation of USO Under Radiation .....</b>	<b>185</b>
<i>J.F. Carlotti, Institut Femto-ST, CNES Toulouse; J.J. Boy, Institut Femto-ST; G. Cibié, CNES Toulouse; C. Inguimbert, ONERA - CERT/DESP-Centre de Toulouse</i>	
<b>Temperature Compensation in SAW Filters by Tri-Layer Wafer Engineering .....</b>	<b>189</b>
<i>K. Bhattacharjee, RF Micro Devices; A. Shvetsov, Moscow Power Engineering Institute; S. Zhgoon, Moscow Power Engineering Institute</i>	
<b>Energy Trapping in Extensional Thin Film MEMS Resonators and Applications to Filtering at UHF Frequencies .....</b>	<b>194</b>
<i>J. Détaint, CNRS; B. Capelle, CNRS; Y. Epelboin, CNRS</i>	
<b>Acoustic Losses in Quartz and Their Links with InfraRed Measurements .....</b>	<b>199</b>
<i>J.J. Boy, Institut Femto-ST; B. Boizot, CEA DSM/DRECAM/LSI; R. Petit, DGA CELAR; D. Picchedda, GEMMA Quartz &amp; Crystal; J.P. Romand, Institut Femto-ST</i>	
<b>Correction Factors for Mindlin Higher-Order Plate Theory with the Consideration of Electrodes .....</b>	<b>203</b>
<i>Ji Wang, Ningbo University; Rongxing Wu, Ningbo University; Wenhua Zhao, Vectron Frequency Devices (Shanghai) Co. Ltd.; Jianke Du, Ningbo University; Dejin Huang, Ningbo University</i>	
<b>Contribution to the Non-Linear Properties of the SAW Transducers .....</b>	<b>208</b>
<i>Jaroslav Nosek, Technical University of Liberec</i>	
<b>Extension of the Legendre Polynomial Approach for Analyzing Composite BAW Resonators .....</b>	<b>216</b>
<i>A. Raheison, Université de Fianarantsoa; F.E. Ratolojanahary, Université de Fianarantsoa; J.E. Lefebvre, Université de Valenciennes; T. Gryba, Université de Valenciennes; E. Ntagwirumugara, Université de Valenciennes</i>	

# Oscillators, Synthesizers & Circuit Techniques I

<b>Heterodyne Frequency Measurement Method based on Virtual Instrument</b> .....	220
<i>Xiaohui Li, Chinese Academy of Sciences; Ya Liu, Chinese Academy of Sciences; Danni Wang, Chinese Academy of Sciences; Yujing Bian, Chinese Academy of Sciences</i>	
<b>Development of a 5 MHz Frequency Difference Premultiplier for a Short Term Frequency Stability Bench of the Oscillators</b> .....	223
<i>Patrice Salzenstein, FEMTO-ST Institute; Xavier Jouvenceau, FEMTO-ST Institute; Xavier Vacheret, FEMTO-ST Institute; Gilles Martin, FEMTO-ST Institute; Franck Lardet-Vieudrin, FEMTO-ST Institute</i>	
<b>Dual-Mode Crystal Oscillator with Simultaneous Excitation of Two Overtones in a Stress Compensated Quartz Resonator</b> .....	227
<i>Vladimír Štofanič, Institute of Physics, Slovak Academy of Sciences; Igor Baláž, Slovak University of Technology; Marián Minárik, Slovak University of Technology</i>	
<b>Temperature Coefficients Improvements of VHF Oscillator Circuit for OCXO</b> .....	230
<i>Fumio Asamura, Nihon Dempa Kogyo Co., Ltd.; Takeo Oita, Nihon Dempa Kogyo Co., Ltd.; Shigeru Obara, Nihon Dempa Kogyo Co., Ltd.; Katsuaki Sakamoto, Nihon Dempa Kogyo Co., Ltd.</i>	
<b>A New 9-GHz Synthesis Chain for Atomic Fountain Clocks</b> .....	234
<i>A. Sen Gupta, National Physical Laboratory; R. Schröder, Physikalisch-Technische Bundesanstalt; S. Weyers, Physikalisch-Technische Bundesanstalt; R. Wynands, Physikalisch-Technische Bundesanstalt</i>	
<b>A Revisit to Phase Noise Model of Leeson</b> .....	238
<i>Xianhe Huang, University of Electronic Science &amp; Technology of China; Feng Tan, University of Electronic Science &amp; Technology of China; Wei Wei, University of Electronic Science &amp; Technology of China; Wei Fu, University of Electronic Science &amp; Technology of China</i>	
<b>High-Stability Miniature OCXOs based on Advanced IHR Technology</b> .....	242
<i>Igor Abramzon, Magic Xtal Ltd.; Sergey Baranushkin, Magic Xtal Ltd.; Alexey Gubarev, Magic Xtal Ltd.; Oksana Rotova, Magic Xtal Ltd.; Vadim Tapkov, Magic Xtal Ltd.</i>	
<b>Design for a Low Phase Noise Overtone TCXO</b> .....	246
<i>Xianhe Huang, University of Electronic Science &amp; Technology of China; Feng Tan, University of Electronic Science &amp; Technology of China; Wei Wei, University of Electronic Science &amp; Technology of China; Wei Fu, University of Electronic Science &amp; Technology of China</i>	
<b>Ultra Low Phase Noise 1 GHz OCXO</b> .....	250
<i>R. Boroditsky, NEL Frequency Controls; J. Gomez, NEL Frequency Controls</i>	
<b>Advanced Bridge Instrument for the Measurement of the Phase Noise and of the Short-Term Frequency Stability of Ultra-Stable Quartz Resonators</b> .....	254
<i>F. Sthal, FEMTO-ST Institute; X. Vacheret, FEMTO-ST Institute; S. Galliou, FEMTO-ST Institute; P.S. Salzenstein, FEMTO-ST Institute; E. Rubiola, FEMTO-ST Institute; G. Cibiél, CNES</i>	
<b>A Generic Multi-Modulus Divider Architecture for Fractional-N Frequency Synthesizers</b> .....	261
<i>Hongyu Wang, University College London; Paul Brennan, University College London; Dai Jiang, University College London</i>	

<b>Overcoming the Mixed Signal Chip Simulation Limits of the EF Anti-Jitter Circuit .....</b>	<b>266</b>
<i>Michael Underhill, Underhill Research; James Brodrick, Toric Limited</i>	
<b>A Study of Temperature Compensated Crystal Oscillator based on Stress Processing .....</b>	<b>272</b>
<i>Wei Zhou, Xidian University; Lin Li, Xidian University; Baoying Feng, Xidian University; Wenqing Zhang, Xidian University; Shanshan Qin, Xidian University; Wenbo Wang, Shijizhuang Electronic Ltd.</i>	
<b>Self-Injection Locking of a Microwave Oscillator by Use of Four-Wave Mixing in an Atomic Vapor .....</b>	<b>275</b>
<i>A. Brannon, University of Colorado at Boulder; V. Shah, University of Colorado at Boulder; Z. Popovic, University of Colorado at Boulder; V. Gerginov, NIST; S. Knappe, NIST; L. Hollberg, NIST; J. Kitching, NIST</i>	
 <b>GNSS &amp; Space Applications</b>	
<b>Analysis of the Timing System Error of the Constellation Automatic Navigation .....</b>	<b>279</b>
<i>Lu Xiaochun, Chinese Academy of Sciences; Wu Haitao, Chinese Academy of Sciences; Li Xiaohui, Chinese Academy of Sciences; Chen Xiaozhong, Graduate University of Chinese Academy of Sciences</i>	
<b>Real-Time Frequency Estimation of Local Oscillators using GPS Timing Receivers .....</b>	<b>285</b>
<i>Yuriy S. Shmaliy, Guanajuato University; Luis Arceo-Miquel, Guanajuato University; Jorge Munoz-Diaz, Guanajuato University; Oscar Ibarra-Manzano, Guanajuato University</i>	
<b>Optimum Time Step and Memory for GPS-based Unbiased FIR Estimates of the Local Clock TIE Model .....</b>	<b>291</b>
<i>Yuriy S. Shmaliy, Guanajuato University; Jorge Munoz-Diaz, Guanajuato University; Luis Arceo-Miquel, Guanajuato University; Oscar Ibarra-Manzano, Guanajuato University</i>	
<b>Development of Satellite Navigation in China .....</b>	<b>297</b>
<i>Sun Hongwei, Chinese Academy of Sciences; Li Zhigang, Chinese Academy of Sciences; Ping Feng, Chinese Academy of Sciences</i>	
<b>Time and Frequency Requirements for an Enhancement of GPS with GEO Satellites .....</b>	<b>301</b>
<i>Takaya Watanabe, FT Design Lab.; Osamu Ichiyoshi, C&amp;C Technology Consultant</i>	
<b>The T2L2 Metrological Test Bed .....</b>	<b>307</b>
<i>P. Vrancken, Observatoire de la Côte d'Azur; E. Samain, Observatoire de la Côte d'Azur; J. Weick, Observatoire de la Côte d'Azur; P. Guillemot, CNES-French Space Agency</i>	
<b>Prospective Performance Budget of the T2L2 Experiment .....</b>	<b>312</b>
<i>Jonathan Weick, Observatoire de la Côte d'Azur; Etienne Samain, Observatoire de la Côte d'Azur; Patrick Vrancken, Observatoire de la Côte d'Azur; Philippe Guillemot, CNES</i>	
<b>Meteor Time Transfer and Meteor Cryptography .....</b>	<b>315</b>
<i>V. Sidorov, Kazan State University; A. Karpov, Kazan State University; V. Korneev, Kazan State University; A. Nasyrov, Tattransgaz</i>	

## Telecommunications

<b>Anatomy of Computer Time and its Application to a DRM Scheme</b> .....	318
<i>Arjulie John Berena, Nihon University; Takahiro Shibata, Nihon University; Masami Kihara, Nihon University</i>	
<b>Time Transfer using an Asynchronous Computer Network: Results from Three Weeks of Measurements</b> .....	323
<i>S.C. Ebenhag, SP Technical Research Institute of Sweden; K. Jaldehag, SP Technical Research Institute of Sweden; P.O. Hedekvist, SP Technical Research Institute of Sweden; R. Emardson, SP Technical Research Institute of Sweden; P. Jarlemark, SP Technical Research Institute of Sweden; C. Rieck, SP Technical Research Institute of Sweden; M. Nilsson, SP Technical Research Institute of Sweden; J. Johansson, SP Technical Research Institute of Sweden; L. Pendrill, SP Technical Research Institute of Sweden; P. Löthberg, SP Technical Research Institute of Sweden; H. Nilsson, SP Technical Research Institute of Sweden</i>	
<b>Next Generation Network Synchronisation Solutions for Packet Networks</b> .....	327
<i>Christian Farrow, Chronos Technology Ltd.; Charles Curry, Chronos Technology Ltd.</i>	
<b>Recent Advances in Continuous On-line Synchronisation Testing for Telecom Networks</b> .....	331
<i>Christian Farrow, Chronos Technology Ltd.</i>	
<b>Clock Synchronization in Telecommunications via PTP (IEEE 1588)</b> .....	334
<i>André Vallat, Oscilloquartz SA; Dominik Schneuwly, Oscilloquartz SA</i>	

## Fundamental Physics

<b>Temporal and Spatial Variation of Fundamental Constants: Theory and Observations</b> .....	342
<i>V.V. Flambaum, University of New South Wales</i>	
<b>Precision Microwave Oscillators and Interferometers to Test Lorentz Invariance in Electrodynamics (an Update)</b> .....	350
<i>M.E. Tobar, University of Western Australia; P. Stanwix, University of Western Australia; E.N. Ivanov, University of Western Australia; A.C. Fowler, University of Western Australia; J.G. Hartnett, University of Western Australia; J.M. le Floch, University of Western Australia / Xlim; M.M. Miao, University of Western Australia; P. Wolf, LNE-SYRTE</i>	
<b>Testing Local Position Invariance with Four H Masers and Four Cs Fountains</b> .....	355
<i>N. Ashby, NIST; T.P. Heavner, NIST; S.R. Jefferts, NIST; A.G. Radnaev, NIST; Y.O. Dudin, NIST</i>	

## Sensors Structures & Instrumentation

<b>Improved Electronic Interfaces for Heavy Loaded AT Cut Quartz Crystal Microbalance Sensors</b> .....	357
<i>Antonio Arnau, Universidad Politécnica de Valencia; José V. García, Universidad Politécnica de Valencia; Yolanda Jiménez, Universidad Politécnica de Valencia; Vittorio Ferrari, Università di Brescia; Marco Ferrari, Università di Brescia</i>	

**Last Improvements in the Analysis of Resonant Strip Sensors ..... 363**

*Bernard Dulmet, FEMTO-ST Institute; Pierre Tinguy, FEMTO-ST Institute; Yuliyah Lazarov, ISSP-BAS;  
Lozan Spassov, ISSP-BAS*

**Design and Use of Wafer Level Fluidic Packaging for Surface Acoustic Wave Sensors ..... 369**

*J.-M. Friedt, SENSEOR; L. El Fissi, SENSEOR; F. Cherioux, FEMTO-ST Institute/LPMO;  
B. Guichardaz, FEMTO-ST Institute; V. Blondeau-Patissier, FEMTO-ST Institute/LPMO;  
S. Ballandras, CNRS FEMTO-ST Institute/LPMO*

**Frequency Characterization of AlN Piezoelectric Resonators ..... 374**

*M.E. Clement, Universidad Politécnica de Madrid; S. González-Castilla, Universidad Politécnica de Madrid;  
J. Olivares, Universidad Politécnica de Madrid; J. Malo, Universidad Politécnica de Madrid; J.I. Izpura,  
Universidad Politécnica de Madrid; E. Iborra, Universidad Politécnica de Madrid; Jesús Sangrador,  
Universidad Politécnica de Madrid*

## **Time Scales**

**The New Generation System of Japan Standard Time at NICT ..... 378**

*Yuko Hanado, NICT; Kuniyasu Imamura, NICT; Noboru Kotake, NICT; Fumimaru Nakagawa, NICT;  
Yoshiyuki Shimizu, NICT; Ryo Tabuchi, NICT; Quoc Tung Lam, NICT; Yukio Takahashi, NICT;  
Mizuhiko Hosokawa, NICT; Takao Morikawa, NICT*

**New Real Time UTC(CH) Generation Scheme at METAS: Recent Progress in Control and Calibration Methods ..... 385**

*Laurent-Guy Bernier, Swiss Federal Office of Metrology; Gregor Duddle, Swiss Federal Office of Metrology;  
Christian Schlunegger, Swiss Federal Office of Metrology*

**The Long Term Stability of EAL and Tai (Revisited) ..... 391**

*G. Petit, Bureau International des Poids et Mesures*

**Precise Point Positioning for Tai Computation ..... 395**

*G. Petit, Bureau International des Poids et Mesures; A. Jiang, Bureau International des Poids et Mesures*

**Further Characterization of the Time Transfer Capabilities of Precise Point Positioning (PPP) ..... 399**

*Nicolas Guyennon, INRiM; Giancarlo Cerretto, INRiM; Patrizia Tavella, INRiM;  
François Lahaye, Natural Resources Canada*

## **Single Ion Optical Clocks**

**<sup>171</sup>Yb<sup>+</sup> Single-Ion Optical Frequency Standards ..... 405**

*I. Sherstov, Physikalisch-Technische Bundesanstalt; Chr. Tamm, Physikalisch-Technische Bundesanstalt;  
B. Stein, Physikalisch-Technische Bundesanstalt; B. Lipphardt, Physikalisch-Technische Bundesanstalt;  
H. Schnatz, Physikalisch-Technische Bundesanstalt; R. Wynands, Physikalisch-Technische Bundesanstalt;  
S. Weyers, Physikalisch-Technische Bundesanstalt; T. Schneider, Physikalisch-Laboratoire Kastler Brossel,  
ENS; E. Peik, Physikalisch-Technische Bundesanstalt*

<b>Progress Toward a Single Indium Ion Optical Frequency Standard</b> .....	407
<i>T. Liu, Max Planck Research Group; Y.H. Wang, Max-Planck Research Group; V. Elman, Max Planck Research Group; A. Stejskal, Max Planck Research Group; Y.N. Zhao, Max-Planck Research Group; J. Zhang, Max-Planck Research Group; Z.H. Lu, Max-Planck Research Group; L.J. Wang, Max-Planck Research Group; R. Dumke, Nanyang Technological University; Th. Becker, Max Planck Institute of Quantum Optics; H. Walther, Max Planck Institute of Quantum Optics</i>	

## **Novel Acoustic Sensing Mechanisms**

<b>Post-CMOS Compatible Aluminum Nitride MEMS Filters and Resonant Sensors</b> .....	412
<i>Roy H. Olsson III, Sandia National Laboratories; James G. Fleming, Sandia National Laboratories; Kenneth E. Wojciechowski, Sandia National Laboratories; Michael S. Baker, Sandia National Laboratories; Melanie R. Tuck, Sandia National Laboratories</i>	

<b>Generalized Characteristics of Resonant Polymer-Coated Microcantilevers in Viscous Liquid Media</b> .....	420
<i>R. Cox, Marquette University; M.J. Wenzel, Marquette University; F. Josse, Marquette University; S.M. Heinrich, Marquette University; I. Dufour, Universite Bordeaux</i>	

<b>Lateral Field Excited Acoustic Wave Devices: a New Approach to Bio-Interface Sensing</b> .....	426
<i>Ulrike Hempel, Otto-von-Guericke University Magdeburg; Ralf Lucklum, Otto-von-Guericke University Magdeburg; Peter Hauptmann, Otto-von-Guericke University Magdeburg</i>	

<b>Use of Torsional Acoustic Resonators for Microweighing, Polymer Rheology, and Monitoring of Biofilm Formation</b> .....	431
<i>Wendelin Bücking, Clausthal University of Technology; Binyang Du, Clausthal University of Technology; Andrey Turshatov, Clausthal University of Technology; Alexander M. König, Clausthal University of Technology; Ilya Reviakine, Clausthal University of Technology; Diethelm Johannsmann, Clausthal University of Technology; Berthold Bode, Flucon GmbH</i>	

<b>A New Thickness Shear Mode Vibratory Gyroscope with Acoustic Gaps Between Pairs of Electrodes</b> .....	434
<i>Yook-Kong Yong, Rutgers University; Mihir Patel, Rutgers University; Shigeo Kanna, Seiko Epson Corporation; Masako Tanaka, Seiko Epson Corporation; Tsutomu Imai, Seiko Epson Corporation</i>	

## **Galileo**

<b>A Report on GPS and Galileo Time Offset Coordination Efforts</b> .....	440
<i>Jörg H. Hahn, ESA-ESTEC; Edward D. Powers, USNO Time Service Department</i>	

<b>Fidelity - Progress Report on Delivering the Prototype Galileo Time Service Provider</b> .....	445

<b>The Fe<sup>3+</sup>:Al<sub>2</sub>O<sub>3</sub> Whispering Gallery Mode Maser Oscillator</b> .....	1031
<i>P.-Y. Bourgeois, FEMTO-ST Institute; K. Benmessai, FEMTO-ST Institute; M. Oxborrow, National Physical Laboratory; M.E. Tobar, University of Western Australia; N. Bazin, FEMTO-ST Institute; J.G. Hartnett, University of Western Australia; Y. Kersalé, FEMTO-ST Institute; V. Giordano, FEMTO-ST Institute</i>	

## **Microwave Standards II**

<b>Improvements to JPL's Compensated Multi-Pole Linear Ion Trap Standard and Long-Term Measurements at the 10<sup>-16</sup> Level</b> .....	1040
<i>E.A. Burt, Jet Propulsion Laboratory; W.A. Diener, Jet Propulsion Laboratory; R.L. Tjoelker, Jet Propulsion Laboratory</i>	
<b>In-Depth Analysis of the Frequency Stability of Optically Pumped Cesium Beam Frequency Standards</b> .....	1049
<i>S. Guérandel, SYRTE; E. de Clercq, SYRTE; R. Barillet, SYRTE; C. Audoin, SYRTE</i>	
<b>Laser Polarization Noise &amp; CPT Atomic Clock Signals</b> .....	1055
<i>James Camparo, The Aerospace Corporation; Michael Huang, The Aerospace Corporation; John Coffey, The Aerospace Corporation</i>	
<b>Blackbody Radiation Shift in Primary Frequency Standards</b> .....	1059
<i>Peter Rosenbusch, LNE-SYRTE; Shougang Zhang, LNE-SYRTE; André Clairon, LNE-SYRTE</i>	

## **Novel Materials, Methods & Applications**

<b>Growth of Quartz Thin Films by Catalyst-Enhanced Vapour-Phase Epitaxy Under Atmospheric Pressure</b> .....	1063
<i>Takato Nakamura, Shizuoka University</i>	
<b>Thin AlN Film Resonators Utilizing the Lowest Order Symmetric Lamb Mode: Further Developments</b> .....	1066
<i>V. Yantchev, Uppsala University; I. Katardjiev, Uppsala University</i>	

<b>Pure Longitudinal Plate Mode Excited by Poled Domains Transducers on LiNbO<sub>3</sub></b> .....	1072
<i>E. Courjon, CNRS FEMTO-ST Institute; J. Masson, CNRS FEMTO-ST Institute; D. Gachon, CNRS FEMTO-ST Institute; L. Gauthier-Manuel, CNRS FEMTO-ST Institute; W. Daniau, CNRS FEMTO-ST Institute; N. Bodin, CNRS FEMTO-ST Institute; S. Ballandras, CNRS FEMTO-ST Institute; J. Hauden, Photline Technologies</i>	

<b>Physical Characterizations of <math>\alpha</math>-GaPO<sub>4</sub> Single Crystals Grown by the Flux Method</b> .....	1076
<i>M. Beaurain, Institut Charles Gerhardt Montpellier; P. Armand, Institut Charles Gerhardt Montpellier; D. Balitsky, Institut Charles Gerhardt Montpellier; Ph. Papet, Institut Charles Gerhardt Montpellier; J. Detaint, IMPMC Universités Pierre et Marie Curie</i>	

## **Synthesizers, Resonators & Noise Mechanisms**

<b>Wide-Band Suppression of Laser Intensity Noise</b> .....	1081
<i>E.N. Ivanov, University of Western Australia; L. Hollberg, NIST</i>	

<b>Frequency Trimming for MEMS Resonator Oscillators</b> .....	1087
<i>Wan-Thai Hsu, Discera Inc.; Andrew R. Brown, Discera Inc.</i>	

<b>A Diophantine Frequency Synthesizer for the Examination of High Spectral Purity</b> .....	1091
<i>Paul P. Sotiriadis, Johns Hopkins University; Gregory L. Weaver, JHU Applied Physics Laboratory</i>	

<b>The Effect of Am Noise on Correlation Phase Noise Measurements</b> .....	1098
<i>Enrico Rubiola, FEMTO-ST Institute; Rodolphe Boudot, FEMTO-ST Institute</i>	

## **Space Clocks**

<b>The PHARAO Space Clock: Results on the Ground Operation of the Engineering Model</b> .....	1105
<i>Philippe Laurent, SYRTE; Christian Jentsch, SYRTE; André Clairon, SYRTE; Pierre Lemonde, SYRTE; Girogio Santarelli, SYRTE; Michel Abgrall, CNES; Christian Sirmain, CNES; Frederic Picard, CNES; Christophe Delaroche, CNES; Olivier Grosjean, CNES; Didier Blonde, CNES; Michel Chaubet, CNES; Philippe Guillemot, CNES; Jean François Vega, CNES; Isabelle Zenone, CNES; Nadine Ladiette, CNES; Christophe Salomon, Laboratoire Kastler Brossel</i>	

<b>Compact Microwave Mercury Ion Clock for Deep-Space Applications</b> .....	1112
<i>John D. Prestage, Jet Propulsion Lab Caltech; Sang K. Chung, Jet Propulsion Lab Caltech; Lawrence Lim, Jet Propulsion Lab Caltech; Armond Matevosian, Jet Propulsion Lab Caltech</i>	

<b>Performance Demonstration of the on-Board Active Hydrogen Maser for the ACES Space Mission of ESA</b> .....	1115
<i>H. Schweda, Observatoire de Neuchâtel; S. Zivanov, Observatoire de Neuchâtel; G. Perruchoud, Observatoire de Neuchâtel; C. Weber, Observatoire de Neuchâtel; B. Thieme, Oerlikon Space AG; G. Baister, Oerlikon Space AG</i>	

<b>Galileo Rubidium Standard - Lifetime Data and GIOVE-A Related Telemetries</b> .....	1121
<i>Fabien Droz, Temex Neuchâtel Time SA; Gérald Barmaverain, Temex Neuchâtel Time SA; Qinghua Wang, Temex Neuchâtel Time SA; Pascal Rochat, Temex Neuchâtel Time SA; Francesco Emma, European Space Agency; Pierre Waller, European Space Agency</i>	

<b>Performance Demonstration of a Compact, Single Optical Frequency Cesium Beam Clock for Space Applications</b> .....	1126
<i>S. Lecomte, Observatoire de Neuchâtel; M. Haldimann, Observatoire de Neuchâtel; R. Ruffieux, Observatoire de Neuchâtel; P. Berthoud, Observatoire de Neuchâtel; P. Thomann, Université de Neuchâtel</i>	

## **Resonators & Filters**

<b>Suppression of the B-Mode in SC-Cuts</b> .....	1131
<i>E.P. EerNisse, Quartzdyne, Inc.; D. Puccio, Quartzdyne, Inc.</i>	

<b>Reduction of Spurious Responses of a Strip Resonator with Tilted Edges</b> .....	1136
<i>Shigetaka Kaga, Nihon Dempa Kogyo Co., Ltd.; Morio Onoe, University of Tokyo</i>	

<b>High Overtone Bulk Acoustic Resonators based on Thinning Single-Crystal Piezoelectric Layers</b> .....	1142
<i>D. Gachon, CNRS FEMTO-ST Institute; E. Courjon, CNRS FEMTO-ST Institute; J. Masson, CNRS FEMTO-ST Institute; B. Guichardaz, CNRS FEMTO-ST Institute; S. Ballandras, CNRS FEMTO-ST Institute</i>	

<b>Bulk Acoustic Wave Resonators 3D Simulation</b> .....	1146
<i>Sylvain Giraud, XLIM Research Institute; Stéphane Bila, XLIM Research Institute; Michel Aubourg, XLIM Research Institute; Dominique Cros, XLIM Research Institute</i>	

<b>Effect of Initial Stresses on Surface Acoustic Waves Propagating in Infinite Elastic Plates</b> .....	1151
<i>Ji Wang, Ningbo University; Rongxing Wu, Ningbo University; Jianke Du, Ningbo University; Dejin Huang, Ningbo University</i>	

## **Oscillators II**

<b>Low Phase Noise Oscillators Including Some Detailed Designs</b> .....	1155
<i>Jeremy Everard, University of York</i>	

<b>Ultra-Stable Oscillators Dedicated to Low-Earth-Orbit Applications: Behavior vs. Radiation</b> .....	1163
<i>G. Cibiél, CNES; P. Canzian, Rakon; Vincent Candelier, Rakon; Jacques Lamboley, Rakon</i>	

<b>Time-Domain Simulation and Spectrum Measurement of Low-Noise Oscillators</b> .....	1169
<i>Remi Brendel, FEMTO-ST Institute; Enrico Rubiola, FEMTO-ST Institute</i>	

<b>A Program to Analyse the Origin of Noise in Ultra-Stable Quartz Crystal Resonators</b> .....	1175
<i>S. Galliou, FEMTO-ST Institute; F. Sthal, FEMTO-ST Institute; X. Vacheret, FEMTO-ST Institute; R. Brendel, FEMTO-ST Institute; P. Salzenstein, FEMTO-ST Institute; E. Rubiola, FEMTO-ST Institute; G. Cibiél, CNES</i>	

## Time Transfer

<b>Combination of GPS Carrier Phase Data with a Calibrated Time Transfer Link .....</b>	<b>1181</b>
<i>Z. Jiang, Bureau International des Poids et Mesures; G. Petit, Bureau International des Poids et Mesures; P. Defraigne, Royal Observatory of Belgium</i>	
<b>Comparison Study of GPS Carrier Phase and Two-Way Satellite Time and Frequency Transfer .....</b>	<b>1187</b>
<i>Tadahiro Gotoh, NICT; Miho Fujieda, NICT; Jun Amagai, NICT</i>	
<b>Studies on Measurement Noise in the European TWSTFT Network .....</b>	<b>1193</b>
<i>D. Piester, Physikalisch-Technische Bundesanstalt; A. Bauch, Physikalisch-Technische Bundesanstalt; J. Becker, Physikalisch-Technische Bundesanstalt; E. Staliuniene, Physikalisch-Technische Bundesanstalt; C. Schlunegger, Federal Office of Metrology METAS</i>	
<b>Development of a Ku Band Satellite Simulator for TWSTFT Applications .....</b>	<b>1199</b>
<i>J. Achkar, Observatoire de Paris</i>	
<b>Two-Way Satellite Time and Frequency Transfer Experiment via IGSO Satellite .....</b>	<b>1205</b>
<i>Xuhai Yang, Chinese Academy of Sciences; Zhigang Li, Chinese Academy of Sciences; Fenglei Wu, Chinese Academy of Sciences; Xiaohui Li, Chinese Academy of Sciences</i>	

## MEMS I

<b>Piezoelectrically Activated Silicon Resonators .....</b>	<b>1209</b>
<i>J. Baborowski, CSEM; C. Bourgeois, CSEM; A. Pezous, CSEM; C. Muller, CSEM; M.-A. Dubois, CSEM</i>	
<b>Si-SiO<sub>2</sub> Composite MEMS Resonators in CMOS Compatible Wafer-Scale Thin-Film Encapsulation .....</b>	<b>1213</b>
<i>Bongsang Kim, Stanford University; Renata Melamud, Stanford University; Matthew Hopcroft, Stanford University; Saurabh Chandorkar, Stanford University; Gaurav Bahl, Stanford University; Matthew Messana, Stanford University; Rob Candler, Robert Bosch Corporation; Gary Yama, Robert Bosch Corporation; Thomas Kenny, Stanford University</i>	
<b>Low Vibration Sensitivity MEMS Resonators .....</b>	<b>1219</b>
<i>Kenneth E. Wojciechowski, Sandia National Laboratories; Roy H. Olsson III, Sandia National Laboratories; Michael S. Baker, Sandia National Laboratories; Johnathan W. Wittwer, Sandia National Laboratories; Kevin J. Smart, Sandia National Laboratories; James G. Fleming, Sandia National Laboratories; Kenneth R. Pohl, Sandia National Laboratories</i>	
<b>Digital Image Processing for Measuring 2D Vibration Amplitudes with Subpixel Resolution: Application to the Quartz Tuning Fork .....</b>	<b>1224</b>
<i>P. Sandoz, FEMTO-ST / LOPMD; E. Carry, FEMTO-ST / LOPMD; J.-M. Friedt, FEMTO-ST / LOPMD; S. Ballandras, FEMTO-ST / LOPMD</i>	
<b>SAW Phononic Reflector Structures .....</b>	<b>1228</b>
<i>N.Y. Kozlovski, University of Central Florida; D.C. Malocha, University of Central Florida</i>	

## Oscillators III - Crystal

### Mass-Produced Quartz Oscillators As Low-Cost Replacement of Passive Rubidium Vapor Frequency Standards ..... 1234

*M. Bloch, Frequency Electronics, Inc.; O. Mancini, Frequency Electronics, Inc.;  
T. McClelland, Frequency Electronics, Inc.*

### A Miniaturized OCXO for Space Application with Low Radiation Sensitivity ..... 1240

*Philippe Guillemot, CNES; Guy Richard, TES; Jean-Marie Tarot, TES*

### Ultra-Low Phase Noise Crystal Oscillators ..... 1245

*Jeremy Everard, University of York; Keng Ng, University of York*

### Noise Measurements of 10 MHz LGT Crystal Oscillators ..... 1250

*J. Imbaud, FEMTO-ST Institute; S. Galliou, FEMTO-ST Institute; J.P. Romand, FEMTO-ST Institute;  
P. Abbé, FEMTO-ST Institute; R. Bourquin, FEMTO-ST Institute*

### Short-Term Frequency Stability Measurement of BVA Oscillators ..... 1254

*Jan Čermák, Czech Academy of Sciences; Alexander Kuna, Czech Academy of Sciences;  
Ludvík Šojdr, Czech Academy of Sciences; Patrice Salzenstein, CNRS FEMTO-ST Institute*

### A New Generation of Very High Stability BVA Oscillators ..... 1260

*Jacques Chauvin, Oscilloquartz SA; Patrick Weber, Oscilloquartz SA; Jean-Pierre Aubry, Oscilloquartz SA;  
Frederic Lefebvre, Oscilloquartz SA; Fabrice Sthal, FEMTO-ST Institute; Serge Galliou, FEMTO-ST  
Institute; Enrico Rubiola, FEMTO-ST Institute; Xavier Vacheret, FEMTO-ST Institute*

## Lattice Clocks

### Strontium Optical Lattice Clock at JILA ..... 1268

*M. Boyd, JILA/NIST and University of Colorado; A. Ludlow, JILA/NIST and University of Colorado;  
S. Foreman, JILA/NIST and University of Colorado; T. Zelevinsky, JILA/NIST and University of Colorado;  
S. Blatt, JILA/NIST and University of Colorado; T. Zanon, JILA/NIST and University of Colorado;  
G. Campbell, JILA/NIST and University of Colorado; M. Miranda, JILA/NIST and University of Colorado;  
M. Martin, JILA/NIST and University of Colorado; J. Ye, JILA/NIST and University of Colorado*

### Stable Laser System for Probing the Clock Transition at 578 nm in Neutral Ytterbium ..... 1274

*C.W. Oates, NIST; Z.W. Barber, NIST; J.E. Stalnaker, NIST; C.W. Hoyt, Bethel University; T.M. Fortier,  
NIST; S.A. Diddams, NIST; L. Hollberg, NIST*

## Space Applications

### Relativistic Time Transfer in the Solar System ..... 1278

*Robert A. Nelson, Satellite Engineering Research Corporation*

### Requirements on orbitography for Space Clock Missions ..... 1284

*Loïc Duchayne, LNE-SYRTE; Flavien Mercier, CNES; Peter Wolf, LNE-SYRTE*

**T2L2 Flight Model Metrological Performances ..... 1291**

*Etienne Samain, Observatoire de la Côte d'Azur; Patrick Vrancken, Observatoire de la Côte d'Azur;  
Jonathan Weick, Observatoire de la Côte d'Azur; Philippe Guillemot, CNES*

**The ACES Microwave Link: Instrument Design and Test Results ..... 1295**

*A. Seidel, Astrium Space Transportation; M.P. Hess, Astrium Space Transportation; J. Kehrler, Astrium  
Space Transportation; W. Schäfer, Timetech GmbH; M. Kufner, Timetech GmbH; M. Siccardi, Timetech  
GmbH; L. Cacciapuoti, European Space Agency; I. Aguilar Sanches, European Space Agency;  
S. Feltham, European Space Agency*

**NASA Architecture for Solar System Time Distribution ..... 1299**

*James J. Miller, National Aeronautics and Space; Al Gifford, National Aeronautics and Space;  
Robert A. Nelson, Satellite Engineering Research Corporation; Larry Felton, Computer Sciences Corporation;  
Lee Pitts, Computer Sciences Corporation; Frank VanLandingham, Computer Sciences Corporation;  
Beryl Brodsky, Overlook Systems Technologies, Inc.; A. J. Oria, Overlook Systems Technologies, Inc.;  
Richard S. Orr, SATEL, LLC; Bryan Welch, NASA Glenn Research Center*

## **Time & Frequency Technology**

**Specific Timing System for the LASER MEGAJOULE Pulse Shaping Function ..... 1304**

*Michel Prat, Commissariat à l'Energie Atomique/DIF;  
Vincent Drouet, Commissariat à l'Energie Atomique/DIF*

**Frequency Dependency of Phase Stability of RF Cables ..... 1309**

*Gerhard Hejc, TimTech GmbH; Wolfgang Schaefer, TimeTech GmbH; Achim Seidel, EADS Space  
Transportation GmbH; Marc-Peter Hess, EADS Space Transportation GmbH; Johannes Kehrler, EADS  
Space Transportation GmbH; Giorgio Santarelli, SYRTE-CNRS; Javier deVicente, European Space Agency*

**Remote Synchronization of Onboard Crystal Oscillator for QZSS using L1/L2/L5 Signals for  
Error Adjustment ..... 1312**

*Toshiaki Iwata, AIST; Michito Imae, AIST; Tomonari Suzuyama, AIST; Yuji Hashibe, Space Engineering  
Development Co. Ltd.; Satoshi Fukushima, Space Engineering Development Co. Ltd.; Akira Iwasaki,  
University of Tokyo; Kenji Kokubu, University of Tokyo; Fabrizio Tappero, University of New South Wales;  
Andrew Dempster, University of New South Wales*

**Ultra Low Cost Base Station Timing Module ..... 1318**

*Charles W.T. Nicholls, Nortel Networks; Philippe Wu, Nortel Networks*

**High-Resolution and Multi-Channel Time Interval Counter using Time-to-Digital  
Converter and FPGA ..... 1324**

*Huijun Zhang, Chinese Academy of Sciences; Xiaohui Li, Chinese Academy of Sciences;  
Yujing Bian, Chinese Academy of Sciences*

## **Miniature Atomic Clocks**

**The Miniature Atomic Clock - Pre-Production Results ..... 1327**

*R. Lutwak, Symmetricom; A. Rashed, Symmetricom; M. Varghese, Draper Laboratory; G. Tepolt, Draper  
Laboratory; J. Leblanc, Draper Laboratory; M. Mescher, Draper Laboratory; D.K. Serkland, Sandia National  
Laboratories; G.M. Peake, Sandia National Laboratories*

<b>Optical Pumping Method to Reduce Light Shift in a Vapor Cell Atomic Frequency Standard .....</b>	<b>1334</b>
<i>M. Zhu, Agilent Technologies</i>	
<b>Generation of Coherent Population Trapping Resonances with Nearly 100% Transmission Contrast .....</b>	<b>1339</b>
<i>V. Shah, NIST; S. Knappe, NIST; L. Hollberg, NIST; J. Kitching, NIST</i>	
<b>Stability of the compact cold atom clock HORACE .....</b>	<b>1342</b>
<i>F.X. Esnault, LNE-SYRTE; S. Perrin, LNE-SYRTE; S. Tremine, LNE-SYRTE; S. Guerandel, LNE-SYRTE; D. Holleville, LNE-SYRTE; N. Dimarcq, LNE-SYRTE; V. Hermann, Thales Electron Devices; J. Delporte, CNES</i>	
<b>The Passive Optically Pumped Rb Frequency Standard: the Laser Approach .....</b>	<b>1346</b>
<i>J. Vanier, University of Montreal; C. Mandache, INFLPR</i>	
 <b>MEMS II</b>	
<b>Contour-Mode Aluminum Nitride Vibrating RF Microsystems .....</b>	<b>1352</b>
