## EFTF 2008 / ENC 2008

An international week devoted to space applications will take place from April 21st to 26th 2008 in Toulouse, France. For the second time the European Frequency and Time Forum will be held simultaneously with The European Navigation Conference.

Four main events are scheduled, including ENC-GNSS 2008, EFTF 2008, an international conference on space applications and a professional exposition with pre-programmed business meetings. Over 1,000 participants are expected.

Related events targeting the general public, students, and young people will also take place throughout the week.

Main organizers: CNES and Midi-Pyrenees Expansion. More information is available at the stand in the promotional area of the TimeNav'07 Exhibition – Booth «ENC-GNSS/EFTF 2008 Toulouse in Midi-Pyrenees, France».

## IEEE FCS 2008

The 62nd International IEEE Frequency Control Symposium will take place from May 19th to May 21st, 2008 at the Hilton Hawaiian Village Hotel, Honolulu, Hawaii, USA.

Recent and original work of interest to the frequency control and timekeeping communities will be presented at the Symposium in the following broad technical areas: piezoelectric materials, filters and resonators, oscillators, synthesizers, noise, timekeeping and time transfer, optical and atomic frequency standards, sensors and transducers.

The Symposium will be preceded by a day of tutorial sessions on May 18th. The tutorials will cover a wide range of related topics.

For updates on conference information as it becomes available, please visit the IEEE website at: <http://www.ieee.org/uffc/fc>.
