# Robust Control Toolbox

## 3.0.1 Release Notes

---

<b>New Functions</b> . . . . .	1-2
<b>Renamed Functions</b> . . . . .	1-3

## New Functions

The Robust Control Toolbox introduced two new functions in version 3.01.

- `actual2normalized`
- `normalized2actual`

## Renamed Functions

`mussvunwrap` has been renamed. It is now called `mussvextract`.
