# SystemTest Release Notes

## **Contents**

Summary by Version About Release Notes	
Version 1.0.1 (R2006b) SystemTest  Bug Fixes or Enhancements	
Version 1.0 (R2006a+) SystemTest	4
Compatibility Summary for SystemTest	5

## **Summary by Version**

This table provides quick access to what's new in each version. For clarification, see "About Release Notes" on page 1.

Version (Release)	New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems	Related Documentation at Web Site
Latest Version V1.0.1 (R2006b)	No	No	Yes Details	Printable Release Notes: PDF  Current product documentation
V1.0 (R2006a+)	Yes Details	No	No	No

#### **About Release Notes**

Use release notes when upgrading to a newer version to learn about new features and changes, and the potential impact on your existing files and practices. Release notes are also beneficial if you use or support multiple versions.

If you are not upgrading from the most recent previous version, review release notes for all interim versions, not just for the version you are installing. For example, when upgrading from V1.0 to V1.2, review the New Features and Changes, Version Compatibility Considerations, and Bug Reports for V1.1 and V1.2.

#### **New Features and Changes**

These include

- New functionality
- Changes to existing functionality
- Changes to system requirements (complete system requirements for the current version are at the MathWorks Web site)

 Any version compatibility considerations associated with each new feature or change

#### **Version Compatibility Considerations**

When a new feature or change introduces a known incompatibility between versions, its description includes a **Compatibility Considerations** subsection that details the impact. For a list of all new features and changes that have compatibility impact, see the Compatibility Summary.

Compatibility issues that become known after the product has been released are added to Bug Reports at the MathWorks Web site. Because bug fixes can sometimes result in incompatibilities, also review fixed bugs in Bug Reports for any compatibility impact.

#### **Fixed Bugs and Known Problems**

MathWorks Bug Reports is a user-searchable database of known problems, workarounds, and fixes. The MathWorks updates the Bug Reports database as new problems and resolutions become known, so check it as needed for the latest information.

Access Bug Reports at the MathWorks Web site using your MathWorks Account. If you are not logged in to your MathWorks Account when you link to Bug Reports, you are prompted to log in or create an account. You then can view bug fixes and known problems for R14SP2 and more recent releases.

#### Related Documentation at Web Site

**Printable Release Notes (PDF).** You can print release notes from the PDF version, located at the MathWorks Web site. The PDF version does not support links to other documents or to the Web site, such as to Bug Reports. Use the browser-based version of release notes for access to all information.

**Product Documentation.** At the MathWorks Web site, you can access complete product documentation for the current version and some previous versions, as noted in the summary table.

## Version 1.0.1 (R2006b) SystemTest

This table summarizes what's new in Version 1.0.1 (R2006b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems	Related Documentation at Web Site
No	No	Yes Details	Printable Release Notes: PDF  Current product documentation

SystemTest was introduced in R2006a+. See Version 1.0 (R2006a+) SystemTest for details about this product.

This release includes bug fixes or enhancements, which are listed below.

#### **Bug Fixes or Enhancements**

The following enhancements were made in Version 1.0.1:

- The Stop element can now be used in Pre Test. In Version 1.0, it could be used only in Main Test. It is now available in both Main Test and Pre Test.
- The Stop element now generates a hyperlink in the **Run Status** pane that gives the name of the Stop element that terminated the test and shows the element in the SystemTest desktop.

### Version 1.0 (R2006a+) SystemTest

This table summarizes what's new in Version 1.0 (R2006a+):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems	Related Documentation at Web Site
Yes Details below	No	No	No

Version 1.0 was released in Web-downloadable form after R2006a, and includes the features listed below.

SystemTest provides a software framework for developing tests that exercise MATLAB algorithms and Simulink models. It includes predefined test elements that let you build and maintain standard test routines. You can save and share tests throughout a development project, ensuring standard and repeatable test verification from research and development through preproduction. You can map test variables into a result set for analysis.

SystemTest is integrated with MATLAB, enabling you to use the MATLAB scripting language and analysis tools to explore large data sets and gain further insight into the behavior of the system. Key features include:

- Develops, manages, and edits test structures
- Uses predefined test elements to test MATLAB algorithms and Simulink models
- Incorporates MATLAB scripts directly into a test
- Maps MATLAB and Simulink workspace variables to test variables
- Offers reusability, so that after you design a test, you can save it for later use by you or others
- Visualizes and analyzes multidimensional test results

## **Compatibility Summary for SystemTest**

This table summarizes new features and changes that might cause incompatibilities when you upgrade from an earlier version, or when you use files on multiple versions. Details are provided in the description of the new feature or change.

Version (Release)	New Features and Changes with Version Compatibility Impact
Latest Version V1.0.1 (R2006b)	None
V1.0 (R2006a+)	None
