Instrument Control Toolbox™ Release Notes

© COPYRIGHT 2005–2011 by The MathWorks, Inc.

The software described in this document is furnished under a license agreement. The software may be used or copied only under the terms of the license agreement. No part of this manual may be photocopied or reproduced in any form without prior written consent from The MathWorks, Inc.

FEDERAL ACQUISITION: This provision applies to all acquisitions of the Program and Documentation by, for, or through the federal government of the United States. By accepting delivery of the Program or Documentation, the government hereby agrees that this software or documentation qualifies as commercial computer software or commercial computer software documentation as such terms are used or defined in FAR 12.212, DFARS Part 227.72, and DFARS 252.227-7014. Accordingly, the terms and conditions of this Agreement and only those rights specified in this Agreement, shall pertain to and govern the use, modification, reproduction, release, performance, display, and disclosure of the Program and Documentation by the federal government (or other entity acquiring for or through the federal government) and shall supersede any conflicting contractual terms or conditions. If this License fails to meet the government's needs or is inconsistent in any respect with federal procurement law, the government agrees to return the Program and Documentation, unused, to The MathWorks, Inc.

Trademarks

MATLAB and Simulink are registered trademarks of The MathWorks, Inc. See www.mathworks.com/trademarks for a list of additional trademarks. Other product or brand names may be trademarks or registered trademarks of their respective holders.

Patents

MathWorks products are protected by one or more U.S. patents. Please see www.mathworks.com/patents for more information.

Summary by Version	1
Version 2.12 (R2011a) Instrument Control Toolbox Software	4
Version 2.11 (R2010b) Instrument Control Toolbox Software	6
Version 2.10 (R2010a) Instrument Control Toolbox Software	8
Version 2.9 (R2009b) Instrument Control Toolbox Software	9
Version 2.8 (R2009a) Instrument Control Toolbox Software	10
Version 2.7 (R2008b) Instrument Control Toolbox Software	12
Version 2.6 (R2008a) Instrument Control Toolbox Software	16
Version 2.5 (R2007b) Instrument Control Toolbox Software	18
Version 2.4.2 (R2007a) Instrument Control Toolbox Software	21
Version 2.4.1 (R2006b) Instrument Control Toolbox Software	22

Compatibility Summary for Instrument Control
Toolbox Software 27

Summary by Version

This table provides quick access to what is new in each version. For clarification, see “Using Release Notes” on page 2.

Version (Release)	New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Latest Version V2.12 (R2011a)	Yes Details	No	Bug Reports Includes fixes
V2.11 (R2010b)	Yes Details	No	Bug Reports Includes fixes
V2.10 (R2010a)	Yes Details	No	Bug Reports Includes fixes
V2.9 (R2009b)	Yes Details	No	Bug Reports Includes fixes
V2.8 (R2009a)	Yes Details	No	Bug Reports Includes fixes
V2.7 (R2008b)	Yes Details	Yes Summary	Bug Reports Includes fixes
V2.6 (R2008a)	Yes Details	No	Bug Reports Includes fixes
V2.5 (R2007b)	Yes Details	Yes Summary	Bug Reports Includes fixes
V2.4.2 (R2007a)	Yes Details	Yes Summary	Bug Reports
V2.4.1 (R2006b)	No	No	Bug Reports
V2.4 (R2006a)	Yes Details	No	Bug Reports
V2.3 (R14SP3)	No	No	Bug Reports
V2.2 (R14SP2)	Yes Details	No	Bug Reports

Using Release Notes

Use release notes when upgrading to a newer version to learn about:

- New features
- Changes
- Potential impact on your existing files and practices

Review the release notes for other MathWorks® products required for this product (for example, MATLAB® or Simulink®). Determine if enhancements, bugs, or compatibility considerations in other products impact you.

If you are upgrading from a software version other than the most recent one, review the current release notes and all interim versions. For example, when you upgrade from V1.0 to V1.2, review the release notes for V1.1 and V1.2.

What Is in the Release Notes

New Features and Changes

- New functionality
- Changes to existing functionality

Version Compatibility Considerations

When a new feature or change introduces a reported incompatibility between versions, the **Compatibility Considerations** subsection explains the impact.

Compatibility issues reported after the product release appear under Bug Reports at the MathWorks Web site. Bug fixes can sometimes result in incompatibilities, so review the fixed bugs in Bug Reports for any compatibility impact.

Fixed Bugs and Known Problems

MathWorks offers a user-searchable Bug Reports database so you can view Bug Reports. The development team updates this database at release time

and as more information becomes available. Bug Reports include provisions for any known workarounds or file replacements. Information is available for bugs existing in or fixed in Release 14SP2 or later. Information is not available for all bugs in earlier releases.

Access Bug Reports using your MathWorks Account.

Documentation on the MathWorks Web Site

Related documentation is available on mathworks.com for the latest release and for previous releases:

- Latest product documentation
- Archived documentation

Version 2.12 (R2011a) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.12 (R2011a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

New Features and changes introduced in this version are:

- “Support for Three New IVI Classes” on page 4
- “IVI-C Class Compliant Wrapper” on page 4
- “Server Sockets Support” on page 5
- “Known Issue – TCP/IP Endian Default” on page 5

Support for Three New IVI Classes

You can now use the following three IVI instrument classes with the Instrument Control Toolbox™ software:

- Upconverter
- Downconverter
- Timercounter

See Using MATLAB IVI Wrappers for more information.

IVI-C Class Compliant Wrapper

The eight supported classes of IVI instruments are now supported for IVI-C using class compliant wrappers. This includes 64-bit support for IVI-C drivers.

The IVI-C wrappers provide an interface to MATLAB for instruments running on IVI-C class compliant drivers.

For more information, see “Using IVI-C Class-Compliant Wrappers”.

Server Sockets Support

Support for Server Sockets is available, using the `NetworkRole` property on the TCP/IP interface. This support is for a single remote connection. You can use this connection to communicate between a client and MATLAB, or between two instances of MATLAB.

For example, you might collect data such as a waveform into one instance of MATLAB, and then want to transfer it to another instance of MATLAB.

For more information, see “Using TCP/IP Server Sockets”.

Known Issue – TCP/IP Endian Default

For the TCP/IP and UDP interfaces, the `Endian` value of the `ByteOrder` property defaults to `bigEndian`. This may cause problems if you need to use `littleEndian`. You should match the byte order of the machine you are connecting to.

Version 2.11 (R2010b) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.11 (R2010b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

New Features and changes introduced in this version are:

- “Support for IVI Class for Digitizers” on page 6
- “Support for IVI Class for Switches” on page 6
- “Support for National Instruments NI-SCOPE Driver Software” on page 6
- “Support for National Instruments NI-FGEN Driver Software” on page 7
- “Enhanced TCP/IP Performance for fread and binblockread Functions” on page 7
- “Two New UDP Packet Size Properties” on page 7

Support for IVI Class for Digitizers

You can now use the IviDigitizer class with the Instrument Control Toolbox software. See Using MATLAB IVI Wrappers for more information.

Support for IVI Class for Switches

You can now use the IviSwtch class with the Instrument Control Toolbox software. See Using MATLAB IVI Wrappers for more information.

Support for National Instruments NI-SCOPE Driver Software

You can now use Instrument Control Toolbox with instruments using the NI-SCOPE version 3.4 driver software.

Support for National Instruments NI-FGEN Driver Software

You can now use Instrument Control Toolbox with instruments using the NI-FGEN version 2.7.2 driver software.

Enhanced TCP/IP Performance for fread and binblockread Functions

fread and binblockread functions are now enhanced with better TCP/IP throughput.

Two New UDP Packet Size Properties

The InputDatagramPacketSize and OutputDatagramPacketSize properties allow you to control the size of the datagram packets and work with larger packets.

Version 2.10 (R2010a) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.10 (R2010a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

New features and changes introduced in this version are:

- “Expanded spoll Function” on page 8
- “Enhanced Test and Measurement Tool” on page 8
- “Support for Agilent 64-Bit GPIB on Windows 64” on page 8

Expanded spoll Function

You can now use the `spoll` function to execute a serial poll on VISA objects.

Enhanced Test and Measurement Tool

The Test and Measurement Tool interface is enhanced as follows:

- Enhanced desktop environment
- Two new menu items, **Desktop** and **Window**, which give you more control of the tool’s size, location and layout

Support for Agilent 64-Bit GPIB on Windows 64

You can now use Instrument Control Toolbox with an Agilent® 64-bit GPIB interface on a Windows 64-bit platform.

Version 2.9 (R2009b) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.9 (R2009b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

New features and changes introduced in this version are:

- “New Class-Compliant Interface for IVI-COM Drivers” on page 9
- “Support for Agilent 64-Bit VISA on Windows 64” on page 9
- “Warning Added for Future Deprecation of UDP Binblock Support” on page 9

New Class-Compliant Interface for IVI-COM Drivers

Instrument Control Toolbox includes a class-compliant interface for IVI-COM drivers that lets you switch among instruments with different interfaces that use a class-compliant IVI-COM driver.

Support for Agilent 64-Bit VISA on Windows 64

You can now use Instrument Control Toolbox with an Agilent 64-bit VISA interface on a Windows 64-bit platform.

Warning Added for Future Deprecation of UDP Binblock Support

A warning has been added for the deprecation of `binblock` read and write operations over an UDP network in a future release of the toolbox. You will receive a warning message if you read or write to an instrument over an UDP network.

Version 2.8 (R2009a) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.8 (R2009a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

New features and changes introduced in this version are:

- “Expanded Platform Support Added for Instrument Control Toolbox” on page 10
- “Using the Status Function with an IVI Driver Can Cause Namespace Conflicts” on page 10
- “Expanded Platform Support Added for NI-VISA and GPIB Interfaces” on page 11
- “IVI-COM Driver Support” on page 11

Expanded Platform Support Added for Instrument Control Toolbox

You can now install the Instrument Control Toolbox software on all platforms.

Using the Status Function with an IVI Driver Can Cause Namespace Conflicts

If you are creating an IVI driver, use the `InstrumentStatus` function to set the status group for the vendor-specific driver status. Using `Status` can cause a namespace conflict. If you are using a MATLAB provided driver, you can continue to use the `Status` function.

Expanded Platform Support Added for NI-VISA and GPIB Interfaces

You can now use Instrument Control Toolbox with a National Instruments® VISA or a GPIB interface on a Windows Vista™ 64 platform.

IVI-COM Driver Support

This version of the Instrument Control Toolbox software offers expanded IVI-COM driver coverage.

Version 2.7 (R2008b) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.7 (R2008b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	Yes—Details labeled as Compatibility Considerations , below. See also Summary.	Bug Reports Includes fixes

New features and changes introduced in this version are:

- “Enhanced IVI-COM Driver Support” on page 12
- “Enhanced Functionality of the Test and Measurement Tool” on page 14
- “Enhanced IVI-C Driver Support” on page 14
- “Expanded Instrument Control Toolbox Demos” on page 14
- “Expanded spill Documentation” on page 15

Enhanced IVI-COM Driver Support

The Instrument Control Toolbox devices can now correctly initialize collections and items.

Compatibility Considerations

IVI-COM drivers generated using MAKEMID in the Instrument Control Toolbox, Version 2.7 (R2008b) will not work with versions prior to Version 2.7 (R2008b), and will throw an error. If you need to use the drivers created with Instrument Control Toolbox Version 2.7, make sure you update your license to the latest release of the MATLAB software.

After you install Instrument Control Toolbox Version 2.7, if you regenerate the MDD file, you will need to update your code. To update your code, change the way you call your collections and items. Collections are now spelled as

a plural noun and items are spelled as a singular noun. For example, if you had an item called `Measurements` and a collection called `Measurement`, you need to change the code so that the item name reads `Measurement` and the collection name reads `Measurements`. The following table shows you an example of the interface and the corresponding methods as it should look once you have updated your code. The example uses the item `Measurement` and the collection, `Measurements`. The example also compares the model with the Agilent `RFPowerMeter` driver model.

Interface	Instrument Control Toolbox Version 2.7 driver model methods	Agilent RFPowerMeter driver methods
<code>Measurement</code>	<code>ClearLimitFails</code> <code>ConfigureRelative</code> <code>Fetch Configure</code> <code>ConfigureTimeGated Measure</code> <code>ConfigureAnalogOutput</code> <code>ConfigureTTLOutput</code> <code>Read ConfigureLimits</code> <code>EnableAnalogOutput</code> <code>ConfigureOffset</code> <code>EnableTTLOutput</code>	<code>ClearLimitFails</code> <code>ConfigureRelative</code> <code>Fetch Configure</code> <code>ConfigureTimeGated Measure</code> <code>ConfigureAnalogOutput</code> <code>ConfigureTTLOutput</code> <code>Read ConfigureLimits</code> <code>EnableAnalogOutput</code> <code>ConfigureOffset</code> <code>EnableTTLOutput</code>
<code>Measurements</code>	<code>Abort</code> <code>IsOperationComplete</code> <code>Initiate</code>	<code>Abort IsOperationComplete</code> <code>Initiate</code>

Here is another example showing the corresponding properties of the two sample interfaces, `Measurement` and `Measurements`. This example also compares the model with the Agilent `RFPowerMeter` driver model.

Interface	Instrument Control Toolbox Version 2.7 driver model properties	AgilentRFPowerMeter driver model properties
Measurement	Feed1Channel Feed1Gate Feed1Type Feed2Channel Feed2Gate Feed2Type LimitAutoClear LimitEnabled LimitFails LimitLower LimitUpper Offset OffsetEnabled Operation RatioUnits RelativeEnabled Resolution Units	Feed1Channel Feed1Gate Feed1Type Feed2Channel Feed2Gate Feed2Type LimitAutoClear LimitEnabled LimitFails LimitLower LimitUpper Offset OffsetEnabled Operation RatioUnits RelativeEnabled Resolution Units
Measurements	Count Name Item	Count Name Item

Enhanced Functionality of the Test and Measurement Tool

Test and Measurement Tool now has advanced interaction between the hardware interfaces and the instrument driver.

Enhanced IVI-C Driver Support

Instruments that require a reset will now work with IVI-C drivers in the Instrument Control Toolbox product.

Expanded Instrument Control Toolbox Demos

The Instrument Control Toolbox product now has a new demo that uses an IVI-COM driver with a mixed signal oscilloscope.

Expanded spoll Documentation

The low-level GPIB `spoll` function now has more documentation to help you work with serial poll.

Version 2.6 (R2008a) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.6 (R2008a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

New features and changes introduced in this version are:

- “Instrument Control Toolbox Block Library” on page 16
- “Improved Throughput” on page 16
- “Instrument Drivers” on page 17
- “Enhanced Capability of the TM Tool” on page 17
- “Support for Agilent IO Libraries Suite 15.0” on page 17
- “fprintf Timeout Errors” on page 17

Instrument Control Toolbox Block Library

There are three new Simulink blocks that can send and receive data via a serial port in Simulink.

- **Serial Configuration** — Configure the parameters for a serial port that you can use to send and receive data.
- **Serial Receive** — Receive binary data over a serial port.
- **Serial Send** — Send binary data over a serial port.

Improved Throughput

Throughput is improved in the Instrument Control Toolbox Serial interface and TCP/IP Receive blocks.

Instrument Drivers

Several new instrument drivers have been added to MATLAB Central.

Enhanced Capability of the TM Tool

The capability for discovery of VISA-USB and VISA TCP/IP (VXI-11) instruments in the TM TOOL is now enhanced.

Support for Agilent IO Libraries Suite 15.0

The Instrument Control Toolbox software now supports the Agilent IO Libraries Suite 15.0.

fprintf Timeout Errors

You will no longer see sporadic timeouts when you write to the serial port using `fprintf`.

Version 2.5 (R2007b) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.5 (R2007b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	Yes—Details labeled as Compatibility Considerations , below. See also Summary.	Bug Reports Includes fixes

New features and changes introduced in this version are:

- “Instrument Control Toolbox Block Library” on page 18
- “Instrument Drivers” on page 19
- “spoll GPIB Status Information” on page 19
- “Obsolete Functions” on page 19
- “New Error Message” on page 19

Instrument Control Toolbox Block Library

There are four new Simulink blocks that can send and receive data over TCP/IP and UDP in Simulink.

- **TCP/IP Receive** — Receive data over a TCP/IP network from a specified remote machine.
- **TCP/IP Send** — Send data over a TCP/IP network to a specified remote machine.
- **UDP Receive** — Receive data over an UDP network from a specified remote machine.
- **UDP Send** — Send data over an UDP network to a specified remote machine.

Instrument Drivers

- Additional instrument drivers are now available for Agilent, LeCroy®, Tabor, and Tektronix® instruments.
- Support for Keithley® version 8.3 GPIB drivers is updated.

spoll GPIB Status Information

Additional GPIB status information is now provided with the `spoll` function.

Obsolete Functions

The following functions are obsolete as of this release. Any attempt to use these functions now results in an error message.

Obsolete Function Name	New Function Name
<code>freeserial</code>	<code>fclose</code>
<code>instrcomm</code>	<code>tmtool</code>
<code>instrcreate</code>	<code>tmtool</code>

Compatibility Considerations

In the previous release, `freeserial` was nonoperational and generated a warning. Now any call to this function generates an error.

In previous releases, `instrcomm` and `instrcreate` opened their own graphical user interfaces. The functionality of these interfaces is available in the `tmtool` GUI.

New Error Message

The `fwritef` and the `fprintf` functions will return an error message if the `flowcontrol` property is set to `hardware` and a hardware connection is not detected. Previously, MATLAB software would fail to respond while it waited for the connection.

Compatibility Considerations

In the previous release, MATLAB software would become unresponsive if the `flowcontrol` property was set to `hardware` and a hardware connection was not detected. The `fwrite` and the `fprintf` functions will now return an error message.

Version 2.4.2 (R2007a) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.4.2 (R2007a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	Yes—Details labeled as Compatibility Considerations , below. See also Summary.	Bug Reports

Confirmation Dialog Preference Settings Moved

The preferences for setting whether a dialog box confirms that you want the MATLAB Instrument Driver Editor and the MATLAB Instrument Driver Testing Tool to create new files are in a new location. You now access them in the **General > Dialog Confirmations** node of the MATLAB Preferences dialog box.

For details on these Instrument Control preference settings, see “General Preferences for Instrument Control” in the Instrument Control User’s Guide documentation.

Compatibility Considerations

In previous versions of MATLAB and Instrument Control Toolbox software, these dialog box preferences were found under the **Instrument Control** node of the Preferences dialog box.

Version 2.4.1 (R2006b) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.4.1 (R2006b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
No	No	Bug Reports

Version 2.4 (R2006a) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.4 (R2006a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports

New features and changes introduced in this version are:

- “Generic Instrument Drivers Supported” on page 23
- “LeCroy Driver” on page 23
- “Agilent Instrument Simulations” on page 24

Generic Instrument Drivers Supported

This release includes support for generic instrument drivers that allow Instrument Control Toolbox software to communicate with devices or software that do not use industry-standard drivers or protocols.

For more information, see “Using Generic Instrument Drivers” in the Instrument Control Toolbox documentation.

LeCroy Driver

This release includes support for LeCroy instrument drivers.

Several drivers ship with the toolbox. You can find these drivers by looking in the directory

```
matlabroot\toolbox\instrument\instrument\drivers
```

where *matlabroot* is the MATLAB installation directory, as seen when you type

```
matlabroot
```

in the MATLAB Command Window.

Many other drivers are available on the MathWorks Web site at

<http://www.mathworks.com/matlabcentral/fileexchange>

including drivers specifically for Instrument Control Toolbox software under the Test and Measurement category.

Agilent Instrument Simulations

Instrument Control Toolbox software includes simulations of the Agilent 33120a function generator and Agilent e3648 DC power supply. These simulations are available as instrument drivers.

You can see the drivers shipped with the release by looking in the directory

```
matlabroot\toolbox\instrument\instrument\drivers
```

where *matlabroot* is the MATLAB installation directory, as seen when you type

```
matlabroot
```

in the MATLAB Command Window.

The Agilent simulations are provided by the drivers

```
generic_agilent_33120a.mdd  
generic_agilent_e3648a.mdd
```

Version 2.3 (R14SP3) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.3 (R14SP3):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
No	No	Bug Reports

Version 2.2 (R14SP2) Instrument Control Toolbox Software

This table summarizes what is new in Version 2.2 (R14SP2):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports

Advantech GPIB Supported

Supported GPIB interfaces now include Advantech® GPIB.

For further information, type

```
instrhelp gpib
```

Compatibility Summary for Instrument Control Toolbox Software

This table summarizes new features and changes that might cause incompatibilities when you upgrade from an earlier version, or when you use files on multiple versions. Details are provided in the description of the new feature or change.

Version (Release)	New Features and Changes with Version Compatibility Impact
Latest Version V2.12 (R2011a)	None
V2.11 (R2010b)	None
V2.10 (R2010a)	None
V2.9 (R2009b)	None
V2.8 (R2009a)	None
V2.7 (R2008b)	See the Compatibility Considerations subheadings for this change: <ul style="list-style-type: none"> • “Enhanced IVI-COM Driver Support” on page 12
V2.6 (R2008a)	None
V2.5 (R2007b)	See the Compatibility Considerations subheadings for these changes: <ul style="list-style-type: none"> • “Obsolete Functions” on page 19 • “New Error Message” on page 19
