*Simulink® PLC Coder™ Release Notes*

© COPYRIGHT 2010–2011 by The MathWorks, Inc.

The software described in this document is furnished under a license agreement. The software may be used or copied only under the terms of the license agreement. No part of this manual may be photocopied or reproduced in any form without prior written consent from The MathWorks, Inc.

FEDERAL ACQUISITION: This provision applies to all acquisitions of the Program and Documentation by, for, or through the federal government of the United States. By accepting delivery of the Program or Documentation, the government hereby agrees that this software or documentation qualifies as commercial computer software or commercial computer software documentation as such terms are used or defined in FAR 12.212, DFARS Part 227.72, and DFARS 252.227-7014. Accordingly, the terms and conditions of this Agreement and only those rights specified in this Agreement, shall pertain to and govern the use, modification, reproduction, release, performance, display, and disclosure of the Program and Documentation by the federal government (or other entity acquiring for or through the federal government) and shall supersede any conflicting contractual terms or conditions. If this License fails to meet the government's needs or is inconsistent in any respect with federal procurement law, the government agrees to return the Program and Documentation, unused, to The MathWorks, Inc.

### Trademarks

MATLAB and Simulink are registered trademarks of The MathWorks, Inc. See [www.mathworks.com/trademarks](http://www.mathworks.com/trademarks) for a list of additional trademarks. Other product or brand names may be trademarks or registered trademarks of their respective holders.

### Patents

MathWorks products are protected by one or more U.S. patents. Please see [www.mathworks.com/patents](http://www.mathworks.com/patents) for more information.

<b>Summary by Version</b> .....	<b>1</b>
<b>Version 1.2 (R2011a) Simulink® PLC Coder</b> .....	<b>3</b>
<b>Version 1.1 (R2010b) Simulink® PLC Coder</b> .....	<b>6</b>
<b>Version 1.0 (R2010a) Simulink® PLC Coder</b> .....	<b>8</b>
<b>Simulink® PLC Coder Compatibility Summary</b> .....	<b>10</b>

## Summary by Version

This table provides quick access to what's new in each version. For clarification, see “Using Release Notes” on page 1.

Version (Release)	New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
V1.2 (R2011a)	Yes Details	No	Bug Reports Includes fixes
V1.1 (R2010b)	Yes Details	No	Bug Reports
V1.0 (R2010a)	Yes Details	Not applicable	Bug Reports

## Using Release Notes

Use release notes when upgrading to a newer version to learn about:

- New features
- Changes
- Potential impact on your existing files and practices

Review the release notes for other MathWorks® products required for this product (for example, MATLAB® or Simulink®). Determine if enhancements, bugs, or compatibility considerations in other products impact you.

If you are upgrading from a software version other than the most recent one, review the current release notes and all interim versions. For example, when you upgrade from V1.0 to V1.2, review the release notes for V1.1 and V1.2.

## What Is in the Release Notes

### New Features and Changes

- New functionality

- Changes to existing functionality

### **Version Compatibility Considerations**

When a new feature or change introduces a reported incompatibility between versions, the **Compatibility Considerations** subsection explains the impact.

Compatibility issues reported after the product release appear under Bug Reports at the MathWorks Web site. Bug fixes can sometimes result in incompatibilities, so review the fixed bugs in Bug Reports for any compatibility impact.

### **Fixed Bugs and Known Problems**

MathWorks offers a user-searchable Bug Reports database so you can view Bug Reports. The development team updates this database at release time and as more information becomes available. Bug Reports include provisions for any known workarounds or file replacements. Information is available for bugs existing in or fixed in Release 14SP2 or later. Information is not available for all bugs in earlier releases.

Access Bug Reports using your MathWorks Account.

### **Documentation on the MathWorks Web Site**

Related documentation is available on [mathworks.com](http://mathworks.com) for the latest release and for previous releases:

- Latest product documentation
- Archived documentation

## Version 1.2 (R2011a) Simulink PLC Coder

This table summarizes what's new in Version 1.2 (R2011a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports Includes fixes

- “Support for New PLC Target IDEs” on page 3
- “Generated Code File Name Can Now Be Renamed” on page 3
- “Generated Code File Header Change” on page 4
- “Support for Lookup Table Blocks” on page 4
- “Support for Fixed Point Data Types” on page 4
- “CORDIC Trigonometric Functions” on page 4
- “64-Bit Support” on page 4
- “New Demos” on page 4

### Support for New PLC Target IDEs

The Simulink® PLC Coder™ software now supports code generation and automatic import of code for the Phoenix Contact® PC WORX™ IDE.

See “Supported IDE Platforms” in the *Simulink PLC Coder™ User’s Guide* for more information.

### Generated Code File Name Can Now Be Renamed

You can now specify a custom name for the code file that you generate with Simulink PLC Coder. Use the **Function name options** parameter in the Subsystem block.

## Generated Code File Header Change

The comment header in the code file that you generate with Simulink PLC Coder now includes a sample time field for the model.

## Support for Lookup Table Blocks

Simulink PLC Coder models can now generate code for lookup table blocks.

## Support for Fixed Point Data Types

Simulink PLC Coder models can now generate code for fixed point data types. For more information, see “Fixed-Point Data Type Limitations” in the *Simulink PLC Coder User’s Guide*.

## CORDIC Trigonometric Functions

The Simulink PLC Coder product now supports code generation for CORDIC trigonometric functions. This support enables you to use trigonometric functions for PLCs that do not support these functions in built-in libraries.

To generate code for CORDIC trigonometric functions:

- 1 Add the Simulink Trigonometric Function block to the coder subsystem.
- 2 Configure the block to the desired trigonometric function.
- 3 From the **Approximation method** parameter, select CORDIC.
- 4 Generate code for the atomic subsystem.

## 64-Bit Support

The Simulink PLC Coder product supports 64-bit systems. You can still use the Simulink PLC Coder product with 32-bit IDEs.

See the MathWorks Web site at Supported IDEs for a list of supported IDEs and platforms.

## New Demos

The following demos are new:

- Airport Conveyer Belt Control System — Illustrates code generated for an airport conveyer belt.
- Generating Structured Text for Simulink Model with Fixed-Point Data Types — Illustrates generating fixed-point code in the Simulink PLC Coder environment.

## Version 1.1 (R2010b) Simulink PLC Coder

This table summarizes what's new in Version 1.1 (R2010b):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports

- “Support for Triggered Subsystems” on page 6
- “Support for New PLC Target IDEs” on page 6
- “Automatic Import of Generated Code” on page 6
- “New Demo” on page 7

### Support for Triggered Subsystems

You can now use the Simulink PLC Coder software to generate code from Simulink triggered subsystems. Use the Triggered Subsystem block. See “How Triggered Subsystem Code Maps to Function Blocks” in the *Simulink PLC Coder User's Guide*.

### Support for New PLC Target IDEs

The Simulink PLC Coder software now supports:

- Siemens® SIMATIC® STEP® 7 IDE
- KW-Software MULTIPROG® 5.0 IDE

See “Supported IDE Platforms” in the *Simulink PLC Coder User's Guide* for more information.

### Automatic Import of Generated Code

You can now automatically import structured text code, generated by the Simulink PLC Coder software, to your PLC IDE. In previous releases, you

imported the generated code manually according to the instructions provided by the PLC IDE manufacturer.

You can take advantage of this capability for the following PLC IDEs:

- CoDeSys IDE V2.3
- Rockwell Automation® RSLogix™ 5000 IDE
- Siemens SIMATIC STEP 7 IDE
- KW-Software MULTIPROG 5.0 IDE

See “Automatically Importing Structured Text Code” in the *Simulink PLC Coder User’s Guide* for more information.

## **New Demo**

A new Simulink PLC Coder demo, Speed Cruise Control System Using Simulink and Stateflow®, illustrates code generated for a cruise control controller subsystem using a triggered subsystem.

## Version 1.0 (R2010a) Simulink PLC Coder

This table summarizes what's new in Version 1.0 (R2010a):

New Features and Changes	Version Compatibility Considerations	Fixed Bugs and Known Problems
Yes Details below	No	Bug Reports

### New Product

Simulink PLC Coder generates hardware-independent IEC 61131-3 structured text from Simulink models, Stateflow charts, and Embedded MATLAB® functions. The structured text is generated in PLCOpen and other file formats supported by widely used integrated development environments (IDEs). As a result, you can compile and deploy your application to numerous programmable logic controller (PLC) and programmable automation controller (PAC) devices.

Simulink PLC Coder generates test benches that help you verify the structured text using PLC and PAC IDEs and simulation tools.

Key features:

- Automatic generation of IEC 61131-3 structured text
- Simulink support, including reusable subsystems, PID controller blocks, and lookup tables
- Stateflow support, including graphical functions, truth tables, and state machines
- Embedded MATLAB support, including if-else statements, loop constructs, and math operations
- Support for multiple data types, including Boolean, integer, enumerated, and floating-point, as well as vectors, matrices, buses, and tunable parameters

- IDE support, including B&R Automation Studio®, PLCopen, Rockwell Automation RSLogix 5000, and Smart Software Solutions CoDeSys
- Test-bench creation

## Simulink PLC Coder Compatibility Summary

This table summarizes new features and changes that might cause incompatibilities when you upgrade from an earlier version, or when you use files on multiple versions. Details are provided in the description of the new feature or change.

<b>Version (Release)</b>	<b>New Features and Changes with Version Compatibility Impact</b>
<b>Latest Version V1.2 (R2011a)</b>	No
V1.1 (R2010b)	No
V1.0 (R2010a)	Not applicable
