

Chapter x01 – Mathematical Constants

1. Scope of the Chapter

This chapter provides mathematical constants required by other functions within the Library. These constants are *not* functions, but they are defined in the header file `<nagx01.h>`. There are no individual documents in this chapter.

2. Available Functions

The value of π

`nag_pi` (X01AAC)

Euler’s constant, γ

`nag_euler_constant` (X01ABC)
