NAG Fortran Library Routine Document

F06PPF (DSYR)

Note: before using this routine, please read the Users' Note for your implementation to check the interpretation of ***bold italicised*** terms and other implementation-dependent details.

1 Purpose

F06PPF (DSYR) performs the symmetric rank-1 update operation

$$A \leftarrow \alpha x x^T + A,$$

where A is an n by n real symmetric matrix, x is an n element real vector, and α is a real scalar.

2 Specification

```
SUBROUTINE F06PPF (UPLO, N, ALPHA, X, INCX, A, LDA)
INTEGER             N, INCX, LDA
double precision    ALPHA, X(*), A(LDA,*)
CHARACTER*1         UPLO
```

The routine may be called by its BLAS name ***dsyr***.

3 Description

None.

4 References

None.

5 Parameters

1: UPLO – CHARACTER*1 *Input*

On entry: specifies whether the upper or lower triangular part of A is stored as follows:

if UPLO = 'U', the upper triangular part of A is stored;
if UPLO = 'L', the lower triangular part of A is stored.

Constraint: UPLO = 'U' or 'L'.

2: N – INTEGER *Input*

On entry: n, the order of the matrix A.

Constraint: $\mathrm{N} \geq 0$.

3: ALPHA – ***double precision*** *Input*

On entry: the scalar α.

4: X$(*)$ – ***double precision*** array *Input*

On entry: the vector x.

5: INCX – INTEGER *Input*

On entry: the increment in the subscripts of X between successive elements of x.

Constraint: $\mathrm{INCX} \neq 0$.

6: A(LDA,$*$) – ***double precision*** array *Input/Output*

Note: the second dimension of the array A must be at least $\max(1, \mathrm{N})$.

On entry: the n by n symmetric matrix A. If UPLO $=$ 'U', the upper triangle of A must be stored and the elements of the array below the diagonal are not referenced; if UPLO $=$ 'L', the lower triangle of A must be stored and the elements of the array above the diagonal are not referenced.

On exit: the updated matrix A.

7: LDA – INTEGER *Input*

On entry: the first dimension of the array A as declared in the (sub)program from which F06PPF (DSYR) is called.

Constraint: LDA $\geq \max(1, \mathrm{N})$.

6 Error Indicators and Warnings

None.
