

NAG Fortran Library Routine Document

X02BKF

Note: before using this routine, please read the Users' Note for your implementation to check the interpretation of *bold italicised* terms and other implementation-dependent details.

1 Purpose

X02BKF returns the minimum exponent parameter e_{\min} of the floating-point arithmetic model.

2 Specification

```
INTEGER FUNCTION X02BKF ()
```

3 Description

None.

4 References

None.

5 Parameters

None.

6 Error Indicators and Warnings

None.

7 Accuracy

None.

8 Further Comments

None.

9 Example

See Section 9 of the document for X02AJF.
