

## ***Note to PowerBASIC Users***

The NI-488.2™ *MS-DOS Software Reference Manual* (part number 320282-01) contains Microsoft BASIC formats and examples for the NI-488.2 routines and NI-488® functions. The Microsoft BASIC CALL syntax used in each routine and function in this manual is compatible with your PowerBASIC application program.

For information on running your application program and using the language interface source file, refer to the PowerBASIC language interface README .DOC file on the distribution diskette.

### **Trademarks**
