

## NOTE TO USERS

The adaptive methods—including the Adaptive Transform, the Inverse Adaptive Transform, and the Adaptive Spectrogram—in the LabVIEW Joint Time-Frequency Analysis Toolkit were implemented with the Adaptive Oriented Orthogonal Projective Decomposition algorithm.

The source code was developed by Professor Qinye. Yin and Zhifang Ni at Xi'an Jiaotong University, China.

For more information about this algorithm, refer to

Yin, Q., Z. Ni, S. Qian, D. Chen. 1997.

Adaptive oriented orthogonal projective decomposition.  
*Journal of Electronics* (Chinese) vol. 25.4: 52–58.
