

# NATIONAL INSTRUMENTS™

# NI Developer Suite™

**PLEASE CAREFULLY READ THE FOLLOWING INSTALLATION INSTRUCTIONS.**

**Complete the following steps if you want to install the LabVIEW Datalogging and Supervisory Control (DSC) module.**

1. Install LabVIEW 6.0. If you want to install the LabVIEW Real-Time (RT) module, included in the Professional Control Edition only, complete steps 2 and 4. If you only want to install the LabVIEW DSC module, complete steps 3 and 4.
2. Install LabVIEW RT 6.0.3. Choose not to mass compile your VIs if prompted after this installation.
3. Install the LabVIEW 6.0.2 update from the `\update` directory on the LabVIEW 6i CD.
4. Install the LabVIEW DSC 6.0.2 module.

**LabVIEW RT requires the English release of LabVIEW 6.0 unless you have LabVIEW RT Japanese. Complete the following steps if you have the French or German version of LabVIEW 6 and you want to install LabVIEW RT.**

1. Uninstall your localized version of LabVIEW.
2. Install LabVIEW 6.0 English, included in all localized Developer Suite kits.
3. Install LabVIEW RT 6.0.3, included in the Professional Control Edition only. Choose not to mass compile your VIs if prompted after this installation.
