

NI 8171 SERIES BIOS VERSION

Install BIOS Version 1.16 on Your Controller

Before installing the hardware and software in this kit, you must have BIOS version 1.16 or later installed on your NI 8171 series controller.

For the latest BIOS, see ftp://ftp.ni.com/support/pxi/pxi-8171/BIOS_update/. The zip file contains an executable and a `Readme.txt` file with instructions on how to update the BIOS.

Note This hardware is *not* compatible with earlier BIOS versions and will not operate properly if an earlier version is installed on your controller.
