MEMORY UPGRADE KIT FOR NI 8171 AND VXIPC™ 770/870B SERIES CONTROLLERS

Before installing the hardware in this kit, install BIOS version 1.30 or later on your NI 8171 Series controller or BIOS version 1.10 on your VXIpc 770/870B Series controller.

For the latest NI 8171 BIOS version, see `ni.com/support/pxi`. For the latest VXIpc 770/870B Series BIOS version, see `ni.com/support/vxi`. Instructions for updating your BIOS are in the `.zip` file at these sites.

Note This hardware is not compatible with earlier BIOS versions and will not operate properly if an earlier version is installed on your controller.
