

DISCONTINUATION OF THE IMAQ™ PXI-1408

NOTE TO USERS

National Instruments is discontinuing the IMAQ PXI-1408 device, cable, and software for Windows and Mac OS. You must place your order for these products by August 31, 2002, and accept delivery for that order by September 31, 2002.

Important Dates

Final Order: August 31, 2002
Final Delivery: September 31, 2002

PXI-1408 quantities are limited. You must submit lifetime buy orders by August 31, 2002. After this date, these products will no longer be available. Please account for attrition of your current product when calculating your lifetime buy quantities.

As stated in the warranty, National Instruments will continue to offer its standard one-year warranty for products purchased by August 31, 2002.

Alternative Solution

National Instruments offers the PXI-1409 (778336-01) as a higher quality alternative to the PXI-1408. Because NI-IMAQ ensures interchangeable camera support, it is not necessary to alter existing code in order to use the PXI-1409.

The PXI-1409 uses a 68-pin VHDCI connector, while the PXI-1408 uses the 25-pin DSUB connector. The IMAQ A6825 adaptor (187797-0R3) is available for interfacing custom PXI-1408 cables with the PXI-1409.

For information on PXI-1409 functionality, visit ni.com/vision.
