INSTALLATION GUIDE

NI CB-37F Terminal Block for Desktop Users

This document describes how to remove the DIN rail mounting clips from the National Instruments CB-37F for desktop use.
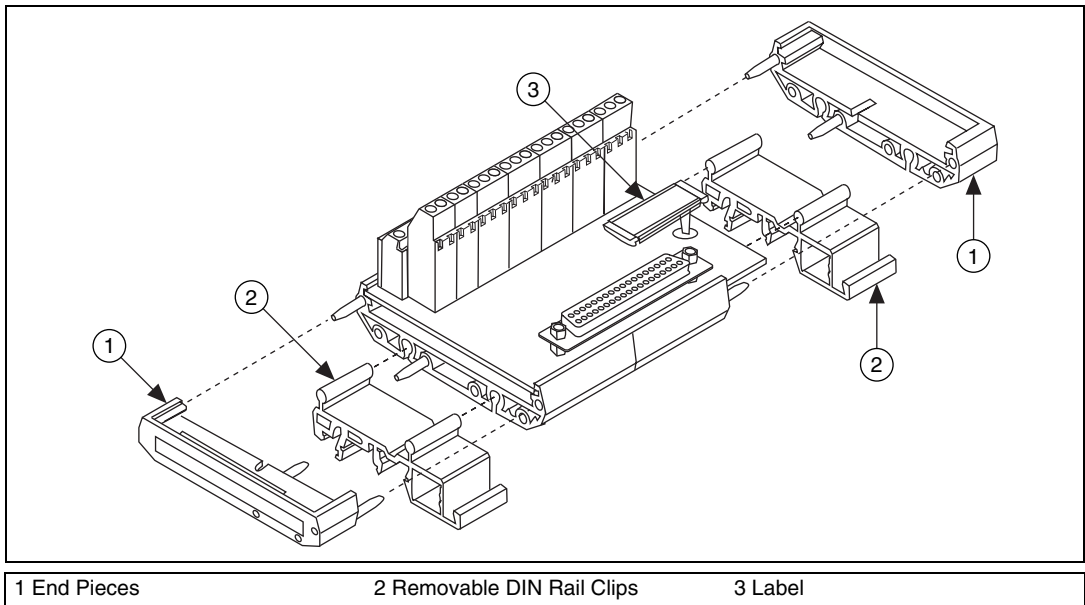

Note The CB-37F screw terminal can accept 24–12 AWG wire.

Removing the Clips and Labeling the CB-37F

Refer to the following parts locator diagram while completing these steps:

1. Using a flathead screwdriver, remove the end pieces from the CB-37F.

2. Remove the DIN rail clips, and reattach the end pieces.

3. On the provided label, write the name of the device that connects to the CB-37F.

| 1 End Pieces | 2 Removable DIN Rail Clips | 3 Label |
