

\*ITDPUBLICATIONS

November 27, 1995

All Information Technology Division (ITD) documentation is available free of charge in printed form or online.

Documentation is stored electronically in at least one of four locations: on the Michigan Terminal System (MTS), the Institutional File System (IFS), GopherBLUE, or the World-Wide Web (WWW).

To find MTS-related documentation on MTS, enter the command \$RUN \*DOCINFO and follow the prompts. \*DOCINFO gives a page count for each document and also allows you to print most of the MTS documentation listed below.

Documentation is stored on IFS in the public directory of the ITD\_Doc directory (or in the Documentation directory, if you authenticate to IFS as a "guest".) The pathname for the public directory is:

`/afs/umich.edu/group/itd/doc/public`

There are several ways to access our Gopher server, GopherBLUE. If your computer has an IP (Internet Protocol) connection (including PPP), an Ethernet connection to the campus backbone, or campus AppleTalk connectivity, you can use Gopher client software, such as TurboGopher for the Macintosh or HGopher for Windows, to access GopherBLUE, or you can telnet directly to the server (gopherblue.umich.edu is the domain name.) If you do not have IP, Ethernet, or campus AppleTalk connectivity, you can use your regular communication software, such as VersaTerm or PROCOMM PLUS, to get to the Network Access Server (NAS) "host:" prompt and type GOPHERBLUE.UMICH.EDU to access GopherBLUE.

To access the ITD Information System on the World-Wide Web, use Web client software to connect to the URL (Uniform Resource Locator):

`http://www.us.itd.umich.edu/itddoc`

Comments or questions regarding ITD documentation can be sent via e-mail to Suzanne Schluederberg at `suz@umich.edu` or by calling (313) 763-8982.

Symbols

-----

These symbols appear under the order column (to the right of the individual listing for each document below) and detail restrictions on the availability of these items:

- # Items that are available at smaller sites (ResComp, SNRE, etc.) Large sites (Angell Hall Courtyard, NUBS, etc.) have most items available, excepting those marked with other symbols below.
- DOC Items that are available on the MTS DOC userID only. See the listing for the file name and location.
- DS Items available from the Doc. Support Staff only. They are usually not intended for placement in the Campus Computing Sites, but are available from us at the above address.
- <-- See the individual listing for special availability information.
- i Items that are available in electronic form (Microsoft Word, PageMaker, or PostScript files) on IFS.
