1954 PRAKTICA

fx

Because you see what you shoot, through the same lens you use for taking the picture, the **Praktica FX** has become the choice of exacting picture-takers throughout the world. No parallax, no chance of error . . . the **Praktica FX** embodies the economy and portability of 35mm, the ease of operation and exacting control of the reflex . . . with the world's finest optics in Pre-set diaphragms. **Praktica FX** offers the scientist, the salesman, the medical man, the serious picture-taker . . . an extremely versatile camera at moderate cost.

The image, transmitted through the taking lens, is reflected by the reflex mirror onto the ground glass.

PRAKTICA FX

24mm x 36mm

Dimensions: 5 7/8" x 3 1/4" x 1 3/4"

Weight: Approx. 1 1/2 lbs.

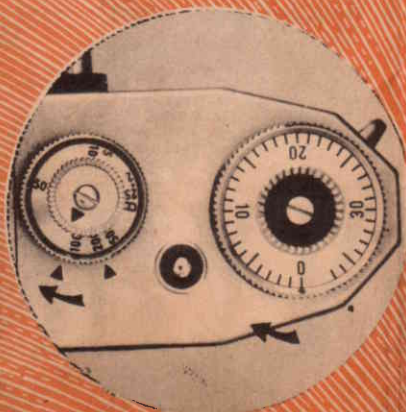

Each PRAKTICA FX is registered and guaranteed 1 full year and includes import certificate

The single lens
reflex that is
many cameras ...
through the use of
quickly interchangeable
lenses and a wide
choice of accessories

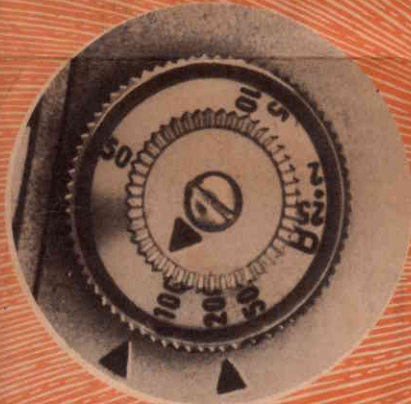

SELF COCKING SHUTTER with a simple twist of the film winding mechanism. Never a double exposure! Never a lost shot!

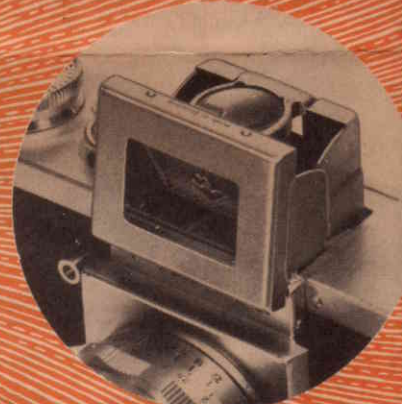

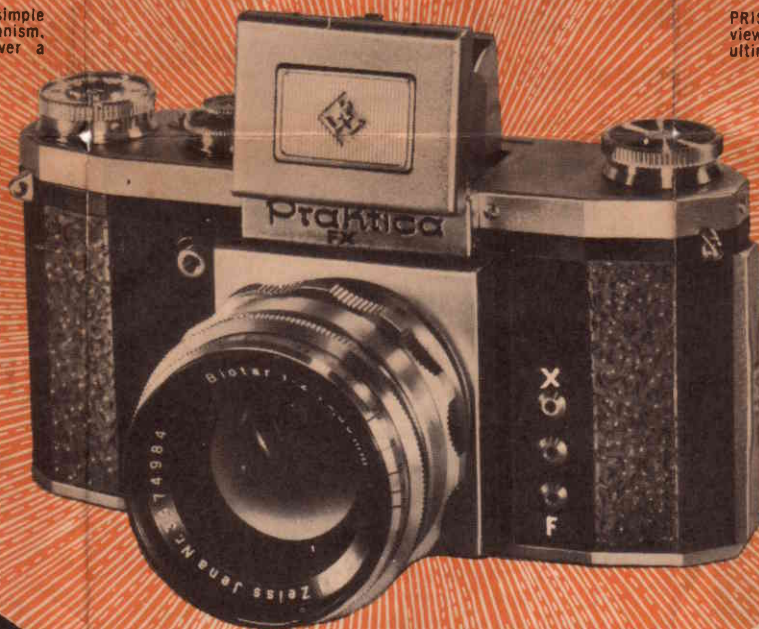

UPRIGHT VIEWING through the taking lens, eliminates Parallax and guess-work. You see your depth-of-field!

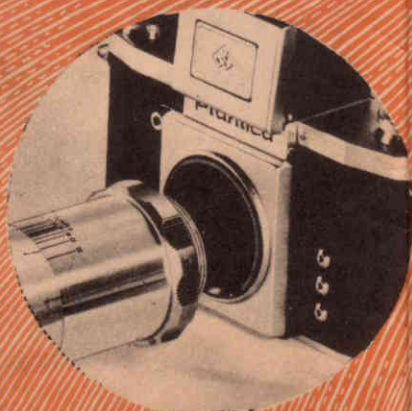

PRISMATIC FINDER permits reflex viewing at comfortable eye-level. The ultimate in viewing perfection.

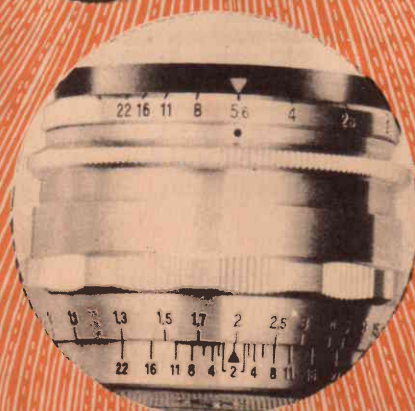

NINE SPEED FOCAL PLANE SHUTTER, 1/500, 1/200, 1/50, 1/25, 1/10, 1/5, 1/2 second and bulb ... a complete range for all requirements.

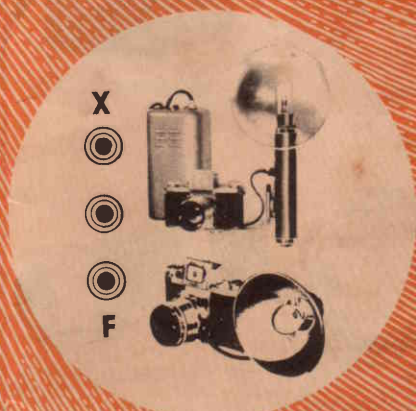

BRILLIANT MAGNIFIER AND SPORTS FINDER add versatility to the Praktica FX. A flick of the finger swings magnifier into position.

INTERCHANGEABLE LENSES offer the use of many lenses of different speeds in normal, wide angle and telephoto focal lengths.

PRE-SET DIAPHRAGM permits split second shooting, without having to review your picture after focusing.

F-X SYNCHRONIZATION, installed in the factory, permits use with either Electronic Flash or regular Photoflash Lamps.
