ne- pref

Prevodi se na engleski na razne načine (neposredno ili posredno):

Kraći i pregledniji opis svih tih načina (ukupno 55) nalazi se i na zalistu rječnika.

A. PRIDJEVI

Pridjevi na **ne-** prevode se na engleski:

1. prilogom not (npr. nezreo not mature)

Komentar:

Najjednostavniji prijevod hrvatskog **ne-**, ali ograničen na predikativnu poziciju i vrlo rijedak u atributivu. Dakle: his reaction was not mature, ali ne: his not mature reaction (nego his immature reaction)

2. prefiksom un- (npr. nezanimljiv uninteresting)

Komentar:

Najčešći i najneutralniji engleski prefiks negativnog značenja. Može se automatski dodati svakom engleskom pridjevu, osim kada duh jezika pretpostavlja ili zahtijeva druge prefikse (non-, in-). Tako ovaj prefiks često alterkira s non- i, mnogo rjeđe, s in- (o čemu vidi u komentaru uz 3 i 4). U pridjevima/participima na -ed prefiks un- je praktički obavezan.

3. prefiksom non- (npr. neboraćki noncombatant²⁵)

Komentar:

Gotovo jednako čest i neutralan prefiks poput un-, ali običniji od njega uz pridjeve niže učestalosti i one iz znanstvenog vokabulara. Ako alterkira s un-, izražava jednostavnu neutralnu suprotnost značenja bez emocionalnih konotacija (npr. nonscientific²⁵: unscientific ili noncooperative²⁵: uncooperative). U nekoliko slučajeva alterkira s un- uz pridjeve/participe na -ed i tu dolazi do razlike u značenju (npr. nonaligned²⁵/nesvrstan/: unaligned/neporavnan/). Javlja se, za razliku od un-, i pred glagolskom osnovom pridjeva (npr. nondrip²⁵, nonskid²⁵, nonstick²⁵). Često dolazi i pred atributivnu imenicu radi tvorbe pseudopridjeva (npr. nonattack²⁵, nonreduction²⁵), gdje je un- praktički neupotrebljiv. Konačno, non- je moguć i pred nekim pridjevskim osnovama na -ing (npr. nonfunctioning²⁵, nonconflicting²⁵).

4. prefiksom in- (npr. neadekvatan inadequate)

Komentar:

Upotreba ovog prefiksa sužena je na pridjeve iz znanstvenog i biranijeg, nekolokvijalnog vokabulara. Osim toga, in- je danas neaktivan prefiks, dakle ne služi za tvorbu novih pridjeva negativnog značenja. Međutim, kod manjeg broja postojećih pridjeva gdje in- alterkira s un-, oblik na in- je ili sasvim istisnuo onog na un- (kao uncredible, uneffable, unexcusable, unexpert) ili je znatno češći od njega (unfirm, unexact, unformal, unpossible).

5. složenim prefiksima other-than i less-than (npr. nezakonski, izvanzakonski other-than-

-legal²⁶; nepametan, ne naročito pametan less-than-intelligent²⁶)

Komentar:

Oba ova složena prefiksa mogu, kako vidimo, poslužiti da izraze specifična negativna značenja: širokog isključivanja (other-than) ili približnog, često ironičnog, nijekanja (less-than).

6. sufiksom -less (npr. nepokretan motionless)

Komentar:

Ovaj sufiks dodaje se normalno imenicama i obično prevodi kao »bez« (ili prefiksom »bez-«, »bes-«), ali u ograničenom broju slučajeva moguć je i prijevod s »ne-« (npr. joyless neveselo, lawless nezakonit, luckless nesretan). Za dodavanje -less nema strukturnih ograničenja, ali postoje stilska. Često, naime, tako nastaju rijetki, knjiški, nategnuti pridjevi kao: healthless, hasteless, trainless, sportless itd.

7. sufiksni riječima -free, -proof, -resistant, -repellent (npr. nekonfiktan conflict-free, nehrđajući rust-proof, nepromočivo water-resistant, water-repellent)

Komentar:

Ove skupine riječi dodaju se imenicama ali uz još veća ograničenja nego -less. Relativno su česte u stručnim i znanstvenim (ali i reklamnim) tekstovima.

8. pridjevima i participima free (of/from), (de)void (of), exempt (from), innocent (of), spared (from), unaffected (by) **pred imenicom** (npr. neafektiran free of/from affectation, neoporezovan exempt from taxation, neponižen spared (from) humiliation)**9. participima** lacking³⁵, needing (odn. in need of), requiring, calling (for), waiting (for) **pred imenicom** (npr. nekonzentriran lacking³⁵ concentration, neporavnan requiring alignment)

Komentar:

Indeks⁽³⁵⁾ upućuje na alternativne riječi/izraze (sa zalista rječnika), dio kojih nisu participi: with no, of no, without, with low itd.

10. priložima inadequately, badly, ill-, under- **pred participom perfekta** (npr. neprozračen inadequately aired, ill-ventilated)**11. priložima i participima** yet, still, needing, requiring **pred pasivnim infinitivom** (npr. neotkriven yet-to-be-discovered²⁶; neporavnan, neprozračen needing to be aligned/aired)**12. priložima** yet i still **pred infinitivom neprelaznih glagola** (npr. nenabujao yet-to-rise).**13. izrazima** unlike that of, not involving, not for... purposes (npr. nesudački unlike that of a judge, nesudski not involving (ili involving no) court proceedings, neobrambeni not for defensive purposes)**14. pridjevima**

a) **s infinitivom**: impossibile, hard (oba s inf. vt.) i unable (s inf. vi.) (npr. neprilagodljiva oprema equipment impossible/hard to adapt)

- b) **s imenicom**: incapable (of), unsuitable (for), impervious (to), proof (from), safe (from), secure (from) (npr. *neprilagodljiv* incapable of adaptation, *nepromočiv* impervious to water, *nenaseljiv* unsuitable for habitation)
- *15. **participima** lacking³⁵ **i** defying **s imenicom** (npr. *neprilagodljiv* lacking/having no (ili of low itd.) adaptability, *nestanjiv* lacking thinning-down properties; *nazamisliv* defying imagination)
- *16. **negativnim participom** not lending (+ itself/oneself to) **s imenicom** (npr. *nenaljepljiv* not lending itself to pasting on)
- *17. **prijedlozima** beyond **i** past **s imenicom** (npr. *neprilagodljiv* beyond/past adaptation ili adaptability)
- *18. **relativnom konstrukcijom** (npr. *nenagovoriv* that cannot be persuaded)
- *19. **izrazima** having low/poor/inadequate/no ili of low/poor itd. **s imenicom** (npr. *neprilagodljiv* having low adaptability, *nestanjiv* of poor thinning-down properties)
- * Vrijedi samo za hrvatske pridjeve na **iv** (-av) i **-bilan**!
- B. PRILOZI**
Prilozi na ne- prevode se na engleski:
20. **prefiksima** un-, non-, in- (npr. *nekomercijalno* uncommercially, noncommercially²⁵; *neodređeno* indefinitely, undefinedly)
Za izbor između ova tri prefiksa v. komentare uz 2-4.
21. **prilogom** not (npr. *neodređeno* not definitely)
22. **složenim prilogom** less than (npr. *neodređeno* less than definitely). *Vidi komentar uz 5.*
23. **izrazima s** manner, way, fashion (npr. *neodređeno* in an indefinite m/w/f, in an undefined m/w/f, in a m/w/f lacking³⁵ definition, in a less-than-defined²⁶ m/w/f)
24. **izrazima s** quality, condition itd. /= (³²)/ (npr. *neodređeno* with an indefinite quality/ /character/appearance, with an undefined q/ /ch/a; in an indefinite condition/state/status/ /form, in an undefined c/s/s/f)
25. **izrazima s** without, with no (oba + n), without being/having (+ p.perf.) (npr. *neodređeno* without defining, without [previous] definition, with no definition, without being/having defined); **odnosno s** refraining from (+ n) (npr. *nešablonizirano* refraining from rote/stereotype)
26. **izrazima s** with low, with a low level/degree of, with inadequate, with an inadequate level/degree of (svi + n) (npr. *neodređeno* with low definition, with a low level/degree of definition, with inadequate definition itd.)
27. **izrazima s** terms, lines, approach (npr. *nesocijalistički* in nonsocialist²⁵ terms, along nonsocialist²⁵ lines, using a nonsocialist²⁵ approach); **odnosno s** unlike (npr. *neparazitski* unlike a parasite)

*Prilozi na -ivo i -abilno mogu se osim gornjih načina (npr. *neodređivo* = undefinably, less than definably, in an undefinable manner, without definability itd.) prevesti još i:*

28. **izrazima s** beyond, past **i** impossible (npr. *neodređivo* in a manner beyond/past definition ili definability, in a manner impossible to define)
29. **izrazima s** possibility (npr. *neodređivo* without a possibility of definition, with no possibility of definition)
- C. IMENICE NA -NJE**
Imenice strukture ne-...-nje prevode se na engleski:
30. **prilogom** not (+ -ing) (npr. *neodređivanje* not defining)
 Komentar:
Ovo je najjednostavniji prijevod, moguć za sve imenice na -nje, ali u stručnom i službenom engleskom zamjenjuje se, gdje god je to moguće, imenicom koja počinje s non- (Vidi i komentare uz 2, 3, 4, 32 i 34)
31. **pridjevom** no (+ -ing, -tion, -ment, -ence itd.) (npr. *neodređivanje* no defining, no definition)
 Komentar:
I ovaj je prijevod, poput prethodnog, moguć za sve imenice na -nje, ali uz pomak značenja i neke restrikcije. Tako, no/not defining is wrong znači »pogrešno je ne definirati«, s time da je oblik s no mnogo rjeđi, a i dvosmislen jer (češće) znači »nikakvo definiranje nije pogrešno«. I dalje: no definition is wrong ima oba značenja kao i no defining is wrong, dok je not definition is wrong nemoguće u engleskom. Konačno, obrazac no + -ing normalno se, osobito u stručnom i službenom engleskom, zamjenjuje imenicom koja počinje s non- (npr. nondefinition²⁵).
32. **prefiksom** non- (npr. *neodređivanje* nondefinition²⁵)
 Komentar:
Nedostatak ovakvih prijevoda je u tome što su upotrebljivi samo uz latinske ili grčke osnove, pa prema tome pretpostavljaju vladanje natprosječnim engleskim vokabularom. Samo osoba koja, na primjer, zna da se »odlaganje« prevodi kao postponement, adjournment, deferment, prorogation može, dakle, obrazovati negativne imenice nonpostponement²⁵, nonadjournment²⁵, nondeferment²⁵ i nonprorogation²⁵. Osobi skromnijeg vokabulara koja vjerojatno raspolaze samo s anglosaskim putting off, prefiks non- ne pomaže jer je tvorba non putting off nemoguća. Ovu ozbiljnu prepreku proširivanju vlastitog vokabulara možemo ipak lako zaobići kontrastivnim obrascem failure to + inf, dakle: neodlaganje failure to put off (o čemu vidi i pod 33).

33. **imenicama** failure, failing, neglect(ing), omission, omitting, inability **s infinitivom** (npr. *neodređivanje* failure to define, omitting to define; *neplutanje* failure/inability to float) **Komentar:**

Prevođenje hrvatske negativne glagolske imenice (ne- + vb + -nje), dakle vrlo čestog obrasca, na engleski pomoću protuobrasca, failure + inf. ima tu veliku prednost što omogućava zaobilaženje specifične vokabularske jedinice sustavnom parafrazom. Tako se, na primjer, »negutanje« može lako prevesti kao failure/inability to swallow, umjesto specifičnim medicinskim terminom noningestion²⁵, čime se znatno povećava potencijal i skromnijeg vokabularskog fonda. (Vidi i komentar uz 32)
